# GLD150 Gold Performance Medical Switchers 150 Watt Single Output 

## SPECIFICATIONS:

## Ac Input

$85-264 \mathrm{Vac}, 47-63 \mathrm{~Hz}$ single phase.

## Input Current

2.8 A line current maximum, at $90 \mathrm{Vac}, 60 \mathrm{~Hz}$ with full rated load,
power factor .99 typical, . 96 minimum. Input current harmonic
content meets the requirements of IEC1000-3-2.

## Output Power

150 W with convection cooling, 180 W with fan cooling.

## Efficiency

Minimum $80 \%$ at full rated load with 230 Vac Input. Approximately $3 \%$ less at 115 Vac.

## Hold-Up Time

Outputs will remain within regulation limits for 25 ms minimum from loss of ac input at full load, 10 ms before Power Fail indication.
Dc Ouput
Total regulation is the maximum deviation from the nominal voltage for all steady state loading conditions. Peak ratings are for 60 s maximum duration, $10 \%$ duty cycle.

## Overload Protection

Fully protected against short circuit and output overload. Short circuit protection is cycling type power limit.

## Minimum Load

No minimum load required to maintain output specifications.

## Output Noise

$0.5 \% \mathrm{rms}, 1 \% \mathrm{pk}-\mathrm{pk}, 20 \mathrm{MHz}$ Bandwidth, differential mode.
Measured with noise probe directly across output terminals of the power supply.

## Transient Response

Main Output - $500 \mu \mathrm{~s}$ typical response time for return to within $0.5 \%$ of final value for a $50 \%$ load step change, $\mathrm{Di} / \mathrm{Dt}<0.2 \mathrm{~A} \mu \mathrm{~s}$. Maximum voltage deviation is $3 \%$.

## Remote Sense

Provided as a standard feature on all models.
Overvoltage Protection
Built in on all models.
Input Protection
Internal ac fuses provided on both lines on all units.

## Voltage Adjustment

Output Voltage is adjustable +/- $5 \%$ with user adjustable potentiometer.
Temperature Coefficient
$0.03 \% /{ }^{\circ} \mathrm{C}$ typical on all outputs.

## Overshoot

Less than $2 \%$ overshoot at turn-on under all conditions, less than $1 \%$ overshoot at turn-off under all conditions. Inhibit
Inhibit signal is pulled to the V1 output common to reduce average output voltage to less than $5 \%$ of nominal.

## FEATURES:

- Compact 4.5 " x 7 " x 1.7 " size
- Power factor corrected to IEC 1000-3-2 Class A
- Less than $300 \mu \mathrm{~A}$ leakage
- EMI compliance to CISPR11, FCC Class B
- Power fail and remote sense standard
- Medical Approved to UL2601-1, IEC601-1/60601-1 and CSA-C22.2 No. 601.1
- 2 year warranty
- C $\in$ marked to LVD

## EMI/EMC Compliance

All models include built-in EMI filtering to meet the EMC requirements of IEC601-1. Unless otherwise stated, all tests are done at full load and 115 and 230 Vac input.

Conducted Emissions
Static Discharge
RF Field Susceptibility
Fast Transients / Bursts
Surge Susceptibility
Conducted RF Susceptibility
Voltage Sags \& Surges

## Inrush Current

Inrush 240 Vac is less than 37 A, averaged over the first ac halfcycle under cold start conditions. Limiting provided by internal thermistors.

## Fan Output

An additional $12 \mathrm{Vdc}, 250 \mathrm{~mA}$ output suitable for powering a dc fan is included in all models. The fan output is both current limited and thermally protected.

## Thermal Shutdown

Provided as a standard feature. Designed to protect unit from prolonged over temperature.

## Power Fail

TTL / CMOS compatible output goes low (<0.5 V) 8 ms before output voltage drops more than $4 \%$ below nominal voltage upon loss of ac power.

## Power Good

TTL / CMOS compatible output goes high more than 100 ms after V1 reaches regulation and should assure that sufficient energy is stored in the input section to provide normal power fail/shutdown.
Medical Approvals
All models are Certified to be in compliance with the applicable requirements of UL2601-1, CSA-C22.2 No. 601.1, IEC601-1/60601-1.
Leakage Current
$70 \mu \mathrm{~A}, 132 \mathrm{Vac} @ 60 \mathrm{~Hz}$ normal conditions. Single fault conditions, $130 \mu \mathrm{~A}$, 254 Vac @ 50 Hz .

## Design Verification Documents

The "Gold" series has undergone rigorous review and design analysis. The following product documentation is available upon request;

1. MTBF study
2. DVT Data
3. EMC / Susceptibility test results

## GLD150 Medical Switchers 150 Watt Multiple Output

| Medical | Output <br> Voltage | Output <br> Current (A) | Output <br> Current (B) | Voltage <br> Adjustment | Total <br> Regulation | OVP <br> Setpoint | Ripple/ Noise |
| :--- | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| GLD150-12 | 12 V | 12.5 A | 15 A | $\pm 5 \%$ | $2 \%$ | $14 \pm 1.1 \mathrm{~V}$ | $1 \%$ |
| GLD150-15 | 15 V | 10 A | 12 A | $\pm 5 \%$ | $2 \%$ | $18.5 \pm 1.5 \mathrm{~V}$ | $1 \%$ |
| GLD150-24 | 24 V | 6.2 A | 7.5 A | $\pm 5 \%$ | $2 \%$ | $28 \pm 2.5 \mathrm{~V}$ | $1 \%$ |
| GLD150-28 | 28 V | 5.3 A | 6.4 A | $\pm 5 \%$ | $2 \%$ | $34 \pm 2.8 \mathrm{~V}$ | $1 \%$ |
| GLD150-48 | 48 V | 3.2 A | 3.75 A | $\pm 5 \%$ | $2 \%$ | $55+4.0 \mathrm{~V}$ | $1 \%$ |

Notes:
A. Maximum continuous current rating for unrestricted convection cooling.
B. Maximum continuous current rating with 150 LFM air or peak rating.
C. Add "C" suffix for cover option and derate convection rating to 130 W .
