

MOS FIELD EFFECT TRANSISTOR μ PA2755GR

SWITCHING N-CHANNEL POWER MOS FET

DESCRIPTION

The μ PA2755GR is Dual N-channel MOS Field Effect Transistor designed for DC/DC converters and power management applications of notebook computers.

FEATURES

- Dual chip type
- Low on-state resistance

 $R_{DS(on)1} = 18 \text{ m}\Omega \text{ MAX. (Vgs} = 10 \text{ V, Ip} = 4.0 \text{ A)}$

 $R_{DS(on)2} = 29 \text{ m}\Omega$ MAX. (Vgs = 4.5 V, ID = 4.0 A)

- Low Ciss: Ciss = 650 pF TYP.
- Built-in G-S protection diode
- Small and surface mount package (Power SOP8)

ORDERING INFORMATION

PART NUMBER	PACKAGE

PACKAGE DRAWING (Unit: mm)

ABSOLUTE MAXIMUM RATINGS (TA = 25°C, All terminals ar e connected.)

Drain to Source Voltage (Vgs = 0 V)	VDSS	30	V
Gate to Source Voltage (Vps = 0 V)	Vgss	±20	V
Drain Current (DC) (Tc = 25°C)	I _{D(DC)}	±8.0	Α
Drain Current (pulse) Note1	D(pulse)	±32	Α
Total Power Dissipation (1 unit) Note2	Pτ	1.7	W
Total Power Dissipation (2 units) Note2	P⊤	2.0	W
Channel Temperature	Tch	150	°C
Storage Temperature	Tstg	-55 to +150	°C
Single Avalanche Current Note3	las	8	Α
Single Avalanche Energy Note3	Eas	6.4	mJ

EQUIVALENT CIRCUIT (1/2 circuit)

- **Notes 1.** PW \leq 10 μ s, Duty Cycle \leq 1%
 - 2. Mounted on ceramic substrate of 2000 mm² x 2.2 mm
 - 3. Starting Tch = 25°C, V DD = 15 V, Rg = 25 Ω , Vgs = 20 \rightarrow 0 V

Remark The diode connected between the gate and source of the transistor serves as a protector against ESD. When this device actually used, an additional protection circuit is externally required if a voltage exceeding the rated voltage may be applied to this device.

- The information in this document is current as of November, 2003. The information is subject to change without notice. For actual design-in, refer to the latest publications of NEC Electronics data sheets or data books, etc., for the most up-to-date specifications of NEC Electronics products. Not all products and/or types are available in every country. Please check with an NEC Electronics sales representative for availability and additional information.
- No part of this document may be copied or reproduced in any form or by any means without the prior
 written consent of NEC Electronics. NEC Electronics assumes no responsibility for any errors that may
 appear in this document.
- NEC Electronics does not assume any liability for infringement of patents, copyrights or other intellectual
 property rights of third parties by or arising from the use of NEC Electronics products listed in this document
 or any other liability arising from the use of such products. No license, express, implied or otherwise, is
 granted under any patents, copyrights or other intellectual property rights of NEC Electronics or others.
- Descriptions of circuits, software and other related information in this document are provided for illustrative
 purposes in semiconductor product operation and application examples. The incorporation of these
 circuits, software and information in the design of a customer's equipment shall be done under the full
 responsibility of the customer. NEC Electronics assumes no responsibility for any losses incurred by
 customers or third parties arising from the use of these circuits, software and information.
- While NEC Electronics endeavors to enhance the quality, reliability and safety of NEC Electronics products, customers agree and acknowledge that the possibility of defects thereof cannot be eliminated entirely. To minimize risks of damage to property or injury (including death) to persons arising from defects in NEC Electronics products, customers must incorporate sufficient safety measures in their design, such as redundancy, fire-containment and anti-failure features.
- NEC Electronics products are classified into the following three quality grades: "Standard", "Special" and "Specific".
 - The "Specific" quality grade applies only to NEC Electronics products developed based on a customerdesignated "quality assurance program" for a specific application. The recommended applications of an NEC Electronics product depend on its quality grade, as indicated below. Customers must check the quality grade of each NEC Electronics product before using it in a particular application.
 - "Standard": Computers, office equipment, communications equipment, test and measurement equipment, audio and visual equipment, home electronic appliances, machine tools, personal electronic equipment and industrial robots.
 - "Special": Transportation equipment (automobiles, trains, ships, etc.), traffic control systems, anti-disaster systems, anti-crime systems, safety equipment and medical equipment (not specifically designed for life support).
 - "Specific": Aircraft, aerospace equipment, submersible repeaters, nuclear reactor control systems, life support systems and medical equipment for life support, etc.

The quality grade of NEC Electronics products is "Standard" unless otherwise expressly specified in NEC Electronics data sheets or data books, etc. If customers wish to use NEC Electronics products in applications not intended by NEC Electronics, they must contact an NEC Electronics sales representative in advance to determine NEC Electronics' willingness to support a given application.

(Note)

- (1) "NEC Electronics" as used in this statement means NEC Electronics Corporation and also includes its majority-owned subsidiaries.
- (2) "NEC Electronics products" means any product developed or manufactured by or for NEC Electronics (as defined above).
