SAW Components

SAW RF filter

TETRA

Series/type:	**B5151**
Ordering code:	**B39421B5151U310**
Date:	September 27, 2010
Version:	1.0

Sample data 

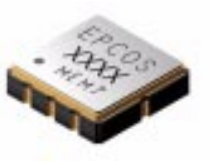
Revision History: Changes compared to previous iteration issue

ISSUE	ORIGINATOR	DETAIL SPEC CHANGES	DATE
DGLV69S01			
0.1	Kok Meng	Initial Release	13.02.2009
LV69A			
1.0	Kok Meng	Filter shifted high by 0.8MHz Updates of attenuation spec for Filter I Relaxation of IL for Filter 2 to 3.5dB Relaxation of AR for Filter 2 to 2.2dB Relaxation of VSWR for Filter 2 to 2.2 Updates of attenuation spec for Filter 2	08.04.2009
DGLV69S02			
0.2	Kok Meng	Change in customer spec for IL and attenuation	03.06.2009
LV69B			
1.0	Kok Meng	With reference to DGLV69S02, Relaxation of IL for Filter I to 2.3dB Improvement of AR for Filter I to 0.9dB Updates of attenaution spec for Filter I Relaxation of IL for Filter 2 to 2.7dB Improvement of AR for Filter 2 to 1.3dB Relaxation of Input VSWR for Filter 2 to 2.1 Updates of attenuation spec for Filter 2	28.08.2009
B5151			
1.0	Kok Meng	Include ordering code	27.09.2010

Sample data SMD

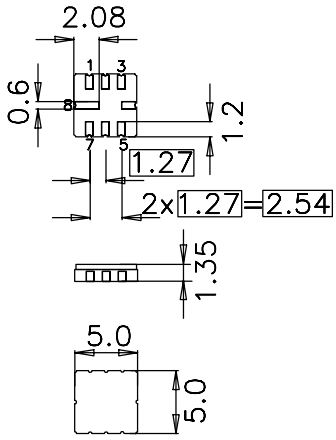
Application

- Low-loss RF filter for TETRA
- Low amplitude ripple
- Usable passband:
  Filter 1 : 20 MHz
  Filter 2 : 30 MHz
- Unbalanced to unbalanced operation
- No matching required for operation at 50 Ω



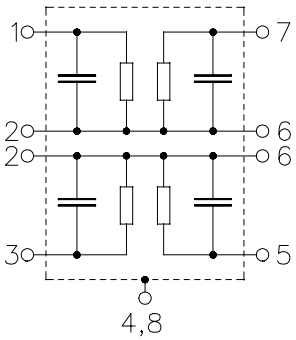
Features

- Package size 5.0 x 5.0 x 1.35 mm³
- Package code QCC8C
- RoHS compatible
- Approximate weight 0.10 g
- Package for **S**urface **M**ount **T**echnology (**SMT**)
- Ni, gold-plated terminals
- **E**lectrostatic **S**ensitive **D**evice (**ESD**)



Pin configuration

■	1	Input [Filter 1]
■	3	Input [Filter 2]
■	7	Output [Filter 1]
■	5	Output [Filter 2]
■	2,6	To be grounded
■	4,8	Case ground



Sample data

SMD

Characteristics of Filter 1

Temperature range for specification: T = -30 to +70˚C
Terminating source impedance: Z_S = 50 Ω
Terminating load impedance: Z_L = 50 Ω

		LV69B [1]			DGL [2]	
		min.	typ. @ 25 ˚C	max.	min./ max.	
Center frequency	f_C	—	390.0	—		MHz
Maximum insertion attenuation	α_{max}					
380.0 ... 400.0 MHz		—	1.8	2.3		dB
Amplitude ripple (p-p)	$\Delta\alpha$					
380.0 ... 400.0 MHz		—	0.4	0.9		dB
Input VSWR						
380.0 ... 400.0 MHz		—	1.7	2.0		
Output VSWR						
380.0 ... 400.0 MHz		—	1.7	2.0		
Attenuation	α					
10.0 ... 150.0 MHz		35	42	—		dB
150.0 ... 287.0 MHz		33	37	—		dB
287.0 ... 335.0 MHz		26	29	—		dB
335.0 ... 360.0 MHz		20	23	—		dB
418.0 ... 442.0 MHz		15	21	—		dB
442.0 ... 456.0 MHz		25	33	—		dB
456.0 ... 532.0 MHz		28	36	—		dB
532.0 ... 560.0 MHz		28	32	—		dB
560.0 ... 668.0 MHz		22	24	—		dB
668.0 ... 1000.0 MHz		22	31	—		dB

[1] Values in columns min, typ and max indicate the development status of the current version.
[2] Values in column DesignGoal (DGL) indicate the target performance.

Sample data

SMD

Maximum ratings of Filter 1

Operable temperature range	T	-40 / +85	˚C	
Storage temperature range	T_{stg}	-40 / +85	˚C	
DC voltage	V_{DC}	0	V	
ESD voltage	V_{ESD}	100 [1)]	V	machine model, 1 pulse
Input Power at 380.0 ... 400.0 MHz	P_{IN}	15	dBm	continuous wave

1) acc. to JESD22-A115A (machine model), 1 negative & 1 positive pulse.

For questions on technology, prices and delivery please contact the Sales Offices of EPCOS AG or the international Representatives.

Due to technical requirements components may contain dangerous substances. For information on the type in question please also contact one of our Sales Offices.

Important notes

The following applies to all products named in this publication:

1. Some parts of this publication contain **statements about the suitability of our products for certain areas of application**. These statements are based on our knowledge of typical requirements that are often placed on our products in the areas of application concerned. We nevertheless expressly point out **that such statements cannot be regarded as binding statements about the suitability of our products for a particular customer application.** As a rule, EPCOS is either unfamiliar with individual customer applications or less familiar with them than the customers themselves. For these reasons, it is always ultimately incumbent on the customer to check and decide whether an EPCOS product with the properties described in the product specification is suitable for use in a particular customer application.
2. We also point out that **in individual cases, a malfunction of electronic components or failure before the end of their usual service life cannot be completely ruled out in the current state of the art, even if they are operated as specified.** In customer applications requiring a very high level of operational safety and especially in customer applications in which the malfunction or failure of an electronic component could endanger human life or health (e.g. in accident prevention or life-saving systems), it must therefore be ensured by means of suitable design of the customer application or other action taken by the customer (e.g. installation of protective circuitry or redundancy) that no injury or damage is sustained by third parties in the event of malfunction or failure of an electronic component.
3. **The warnings, cautions and product-specific notes must be observed.**
4. In order to satisfy certain technical requirements, **some of the products described in this publication may contain substances subject to restrictions in certain jurisdictions (e.g. because they are classed as hazardous)**. Useful information on this will be found in our Material Data Sheets on the Internet (www.epcos.com/material). Should you have any more detailed questions, please contact our sales offices.
5. We constantly strive to improve our products. Consequently, **the products described in this publication may change from time to time**. The same is true of the corresponding product specifications. Please check therefore to what extent product descriptions and specifications contained in this publication are still applicable before or when you place an order.
   We also **reserve the right to discontinue production and delivery of products**. Consequently, we cannot guarantee that all products named in this publication will always be available. The aforementioned does not apply in the case of individual agreements deviating from the foregoing for customer-specific products.
6. Unless otherwise agreed in individual contracts, **all orders are subject to the current version of the "General Terms of Delivery for Products and Services in the Electrical Industry" published by the German Electrical and Electronics Industry Association (ZVEI)**.
7. The trade names EPCOS, BAOKE, Alu-X, CeraDiode, CSMP, CSSP, CTVS, DeltaCap, DigiSiMic, DSSP, FormFit, MiniBlue, MiniCell, MKD, MKK, MLSC, MotorCap, PCC, PhaseCap, PhaseCube, PhaseMod, PhiCap, SIFERRIT, SIFI, SIKOREL, SilverCap, SIMDAD, SiMic, SIMID, SineFormer, SIOV, SIP5D, SIP5K, ThermoFuse, WindCap are **trademarks registered or pending** in Europe and in other countries. Further information will be found on the Internet at www.epcos.com/trademarks.
