

LINEAR INTEGRATED CIRCUITS

TYPE uA702M GENERAL-PURPOSE OPERATIONAL AMPLIFIER

D1004, JUNE 1976—REVISED OCTOBER 1983

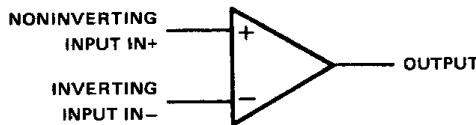

- Open-Loop Voltage Amplification . . . 3600 Typ
- CMRR . . . 100 dB Typ
- Designed to be Interchangeable with Fairchild μA702

description

The uA702 is a high-gain, wideband operational amplifier having differential inputs and single-ended emitter-follower outputs. Provisions are incorporated within the circuit whereby external components may be used to compensate the amplifier for stable operation under various feedback or load conditions. Component matching, inherent in silicon monolithic circuit-fabrication techniques, produces an amplifier with low-drift and low-offset characteristics. The uA702 is particularly useful for applications requiring transfer or generation of linear and nonlinear functions up to a frequency of 30 MHz.

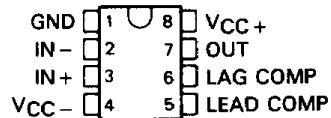

The uA702 is characterized for operation over the full military temperature range of -55°C to 125°C .

schematic

Component values shown are nominal

absolute maximum ratings over operating free-air temperature range (unless otherwise noted)

Supply voltage V_{CC+} (see Note 1)	14 V
Supply voltage V_{CC-} (see Note 1)	-7 V
Differential input voltage (see Note 2)	± 5 V
Input voltage (either input, see Notes 1 and 3)	-6 V to 1.5 V
Peak output current ($t_w \leq 1$ s)	50 mA
Continuous total dissipation at (or below) 70°C free-air temperature (see Note 4)	300 mW
Operating free-air temperature range	-55°C to 125°C
Storage temperature range	-65°C to 150°C
Lead temperature 1.6 mm (1/16 inch) from case for 60 seconds	300 °C

NOTES: 1. All voltage values, unless otherwise noted, are with respect to the network ground terminal.
 2. Differential voltages are at the noninverting input terminal with respect to the inverting input terminal.
 3. The magnitude of the input voltage must never exceed the magnitude of the lesser of the two supply voltages.
 4. For operation above 70°C free-air temperature, refer to Dissipation Derating Curves, Section 2. In the JG packages, uA702M chips are alloy-mounted.
