

DC MOTOR SPEED CONTROLLER FOR CASSETTE TAPE RECORDER SYSTEM

The KIA6903P is a monolithic IC developed for speed control of general purpose DC motors. This IC consist of a reference voltage generator, current multiplier, comparator and start circuit.

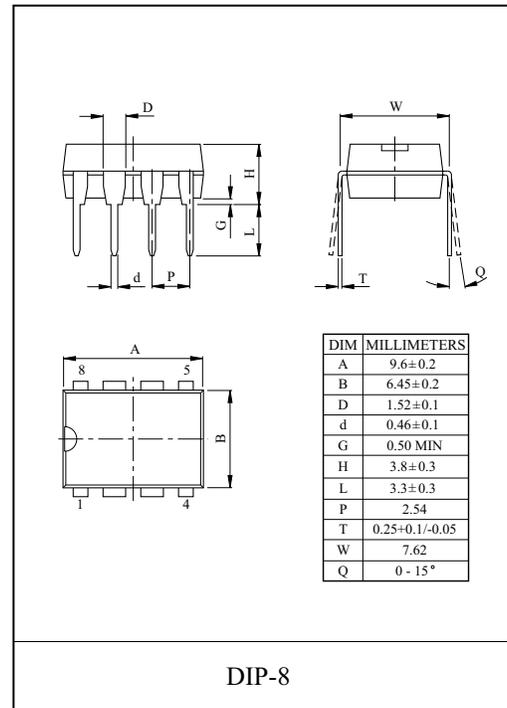

The IC controls the speed of a DC motor by detecting counter electromotive force from the DC motor.

FEATURES

- Wide Range of Working Power Supply Voltage.
($V_{CC}=3.5 \sim 18V$)
- Very Large Starting Torque at the low Voltage.
- Large Allowable Loss due to Effective Utilization of Substrate Radiation.
- Usable for Various DC Motors by Means of Changing Constants of the External Components.

APPLICATION

- Radio Cassette Tape Recorders
