

## BTA20/BTB20 Series 20A TRIACs

### DESCRIPTION:

High current density due to double mesa technology, SIPOS and Glass Passivation.

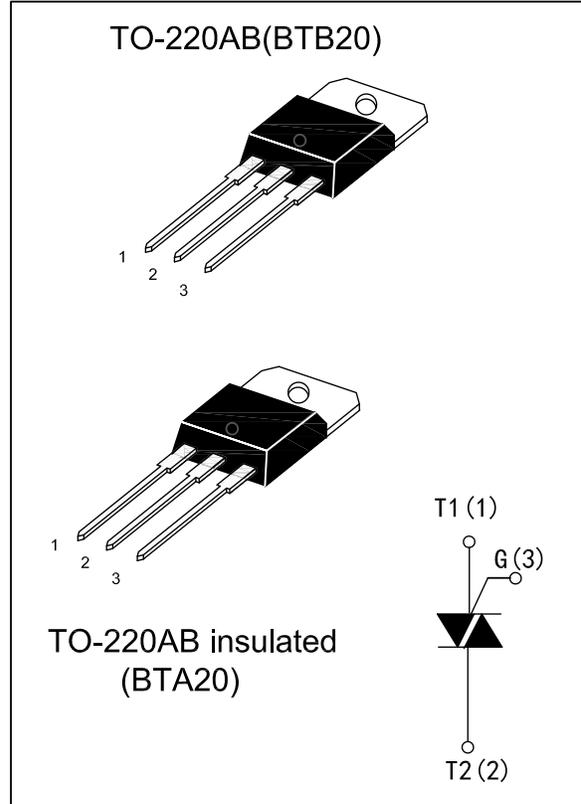

BTA20/BTB20 series triacs is suitable for general purpose AC switching. They can be used as an ON/OFF Function in applications such as static relays, heating regulation, induction motor starting circuits... or for phase control operation light dimmers, motor speed controllers.

BTA20/BTB20 -xxx\*CW, -xxx\*BW are 3 Quadrants triacs, They are specially recommended for use on inductive loads.

BTA20 are isolated internally, they provide a 2500V RMS isolation voltage from all three terminals to external heatsink.
