Product Description

BeRex's BT331 is a high power and a high dynamic range amplifier in a low cost surface mount package(SOIC-8) with a RoHS-compliant, that incorporates reliable heterojunction-bipolar-transistor (HBT) devices fabricated with InGaP GaAs technology.

This device is designed for use where high linearity is required and features high OIP3 and Power with low consumption current (400mA) and requires a few external matching components such as a DC blocking capacitors on the In/Output pin, a bypass capacitor and a RF choke for the out port.

Applications

- Base station Infrastructure/RFID
- Commercial/Industrial/Military wireless system

Application Circuits

*external matching circuit: refer to the page 4 to 16.
