

**IL1083****IC of adjustable voltage regulator of positive polarity with low residual voltage and load current 7,5 A**

IC IL1084 is a powerful adjustable voltage regulator of positive polarity with low residual voltage and load current 7,5 A.

IC of powerful adjustable voltage regulator with low residual voltage lower than 1,5A and reference voltage 1,25 V is purposed for producing constant temperature-stabilized voltage of positive polarity by means of the value set by external resistive divider and used in electronic equipment as a source of stabilized supply.

**Properties:**

- Reference voltage 1,25V
- Output current up to 7,5 A
- Input-output voltage difference,  $U_{IN} - U_O$  up to 30 V
- Residual voltage lower than 1,5 V
- Overload protection
- Embedded temperature protection
- Operation range of chip temperature from 0 up to +125°Ñ.

IL1083

$\tilde{N}1, \tilde{N}2$  – smoothing capacitors,  $C1=10 \text{ mkF}$ ,  $\tilde{N}2=100 \text{ mkF}$  ( $Ta$ ),

D1 - IC,

R1, R2 - resistors,  $R1=121 \hat{\text{ i}} \pm 1\%$ , R2 – adjusted with accuracy 1%.

Output voltage  $U_o, V$ , is defined by formula:

$$U_o = U_{ref} \left(1 + \frac{R2}{R1}\right) + I_{Adj} R2,$$

Where  $U_{ref}$  - reference voltage, V,

$I_{Adj}$  - adjustment current, mA.

Since  $I_{ADJ}$  has values not more than 120 mA, inaccuracy dependent on this value for  $U_o$  – is minor.

**Notes:**

1 Measurement of electrical characteristics is carried out when capacitance  $\tilde{N}_{IN}=10\text{mkF}$  is connected to the input and  $\tilde{N}_i=100\text{mkF}$  – to the output;

2 Reference voltage  $U_{ref}$  in adjustable regulator is measured between outputs Output and Adjust on resistance R1 (figure 1);

3 Parameters stipulated in table 1 are ensured for constant chip temperature  $T_J$ . Measurement of parameters should be performed using heatsink and pulse technique;

4  $I_{FULL\ LOAD}$  – value of maximum output current dependent on input-output voltage difference  $(U_{IN} - U_O)$  with power dissipation in package  $\hat{Q}=28 - 30\text{W}$ .
