 EVQPLMA15 1. Notification Items 1.1 Law and the regulation which are applied ①This product has not been manufactured with ozone depleting chemical controcthe Montreal Protocol. ②This product complies with the RoHS Directive (Restriction of the use of contracted and electronic equipment (DIRECTIVE 2002, 3) ③All the materials used in this part are registered material under the Law 0 the Examination and Regulation of Manufacture etc. or Chemical Substances. ④Permission must be obtained from the Japanese government if the product that to the "Foreign Exchange and Foreign Trade Law" is to be exported or taken 1.2 Application Limits This product was designed and manufactured for general electronics devices appliances, office equipment, data and communication equipment. For the following applications in which high reliability and safety are result applications in which the failure or malfunction of the products may d jeopardize life or cause threat of personal asset, please contact us befor "Aircraft and aerospace equipment (automotives, trains, boat etc), high put information processing devices or the other equipments or devices that equivalent to the above mentioned. 	blled under ertain /95/EC). Concerning at is subject out of Japan. household quired, or for irectly rehand. medical blic
 1.3 Handling of reference specification. Since the contents of this reference specification are subjected to change prior notifications, please request us a formal specification again for you investigations before using. 1.4 Manufacturing Sites The country of manufacture : Japan Panasonic Electronic Devices Japan Co., Ltd. 	
2. Summary2.1 This specifications applies to the following types of switch. Push-ON type S.P.S.T	
2.2 This specifications is a constituent document of contract for business co your company and Panasonic Corporation.	ncluded between

 (For use in equipment for which safety is requested) Although care is taken to ensure product quality, inferior characteristics, short and open circuits are some problems that might be generated. To design an equip places maximum emphasis on safety, review the effect of any single fault of a pr in advance and perform virtually fail-safe design to ensure maximum safety by: Preparing a protective circuit or a protective device to improve system safety Preparing a redundant circuit to improve system safety so that the single fault of a product does not cause a dangerous situation. 	oment which coduct 7, and equipment.
[Attentions required for storage condition] • When this product is to be stored in the following circumstances and conditions affect on the performance deteriorations and solderability etc., avoid storing if following conditions. (1) A place where the temperature is -10°C max., +40°C min. and the humidity is 8 (2) In the corrosive gas atmosphere. (3) Long-term storage for 6 months min. (4) A place where the product is exposed to direct sunlight. • Store in packed condition so that the load stress is not applied. • Please use this product as soon as possible, our recommendation is within 3 mont limitation is 6 months. • If any remainder left after packing is opened, store it with proper moistureproor gasproofing, etc.,	in the 5% min. hs and the
