Classification REFERENCE SPECIFICATION	Issue No. 20091003
Part Name LIGHT TOUCH SWITCH Part No. EVQPSG02K	1/8
<ol> <li>Notification Items         <ol> <li>1 Law and the regulation which are applied                 <ol></ol></li></ol></li></ol>	ertain /95/EC). Concerning at is subject
1.2 Application Limits This product was designed and manufactured for general electronics devices appliances, office equipment, data and communication equipment. For the following applications in which high reliability and safety are re- the applications in which the failure or malfunction of the products may d jeopardize life or cause threat of personal asset, please contact us befor •Aircraft and aerospace equipment, anti-disaster or anti-crime equipment, equipment, transport equipment(automotives, trains, boat etc), high pu information processing devices or the other equipments or devices that equivalent to the above mentioned.	quired, or for irectly rehand. medical blic
<ul> <li>1.3 Handling of reference specification.</li> <li>Since the contents of this reference specification are subjected to chang prior notifications, please request us a formal specification again for you investigations before using.</li> </ul>	
1.4 Manufacturing Sites ① The country of manufacture : Japan Panasonic Electronic Devices Japan Co., Ltd.	
<ol> <li>Summary</li> <li>This specifications applies to the following types of switch. Push-ON type S.P.S.T</li> </ol>	
2.2 This specifications is a constituent document of contract for business co your company and Panasonic Corporation.	ncluded between
2.3 Items not particularly specified in this specifications shall be in confo JIS Standards.	rmance with

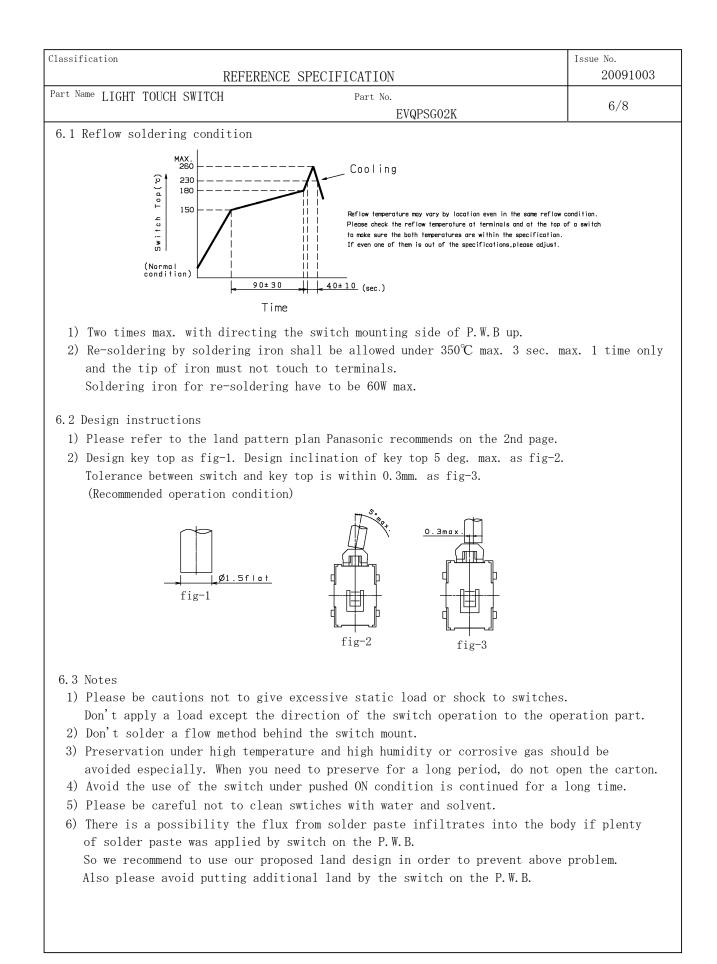

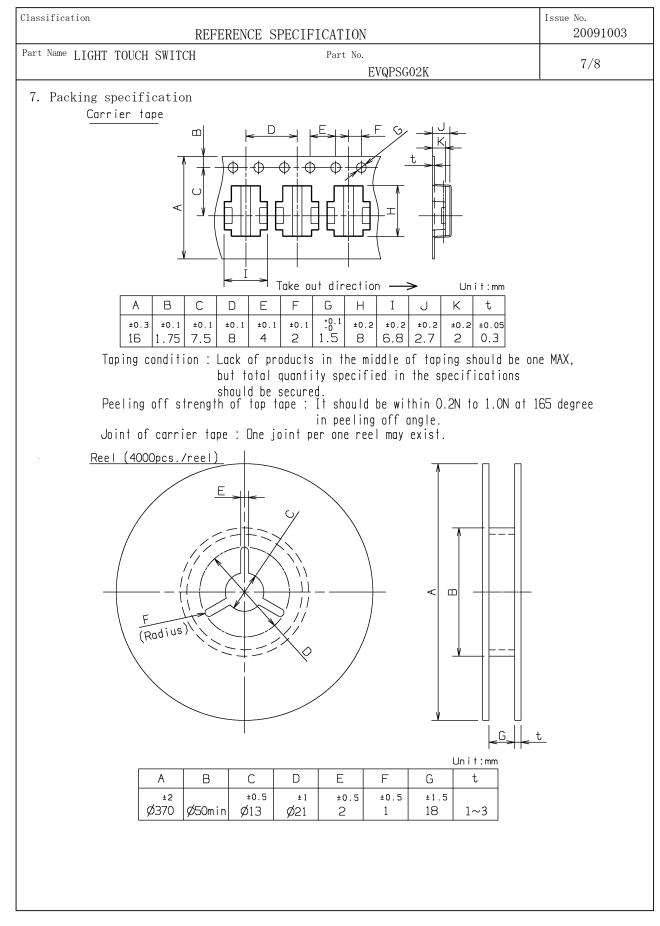

Panasonic Electronic Devices Co., Ltd.

Classification REFERENCE SPECIFICATION	Issue No. 20091003
Part Name LIGHT TOUCH SWITCH Part No.	
EVQPSG02K	8/8
<pre><prohibitions and="" for="" handling="" precaution=""> [Prohibited items on fire and smoking]    Absolutely avoid use of a product beyond its rated range because doing so may a lf misuse or abnormal use may result under conditions in which the product rated range, take proper measures such as current interruption using a protee.    The grade of nonflammability for resin used in product is "94HB," which is a Standards (flammability test for plastic materials). Prohibit use in a local spreading fire may be generated or prepare against a spreading fire.</prohibitions></pre>	is used out of its ctive circuit. based on UL94
<ul> <li>(For use in equipment for which safety is requested)</li> <li>Although care is taken to ensure product quality, inferior characteristics, shand open circuits are some problems that might be generated. To design an e places maximum emphasis on safety, review the effect of any single fault of in advance and perform virtually fail-safe design to ensure maximum safety H.</li> <li>Preparing a protective circuit or a protective device to improve system sate. Preparing a redundant circuit to improve system safety so that the single of a product does not cause a dangerous situation.</li> </ul>	equipment which a product by: fety,and equipment.
[Attentions required for storage condition] • When this product is to be stored in the following circumstances and condit affect on the performance deteriorations and solderability etc., avoid stori following conditions. (1) A place where the temperature is -10°C max., +40°C min. and the humidity : (2) In the corrosive gas atmosphere. (3) Long-term storage for 6 months min. (4) A place where the product is exposed to direct sunlight. • Store in packed condition so that the load stress is not applied. • Please use this product as soon as possible, our recommendation is within 3 minitation is 6 months. • If any remainder left after packing is opened, store it with proper moisture gasproofing, etc.,	ng in the is 85% min. months and the
