

# Infrared Receiver Module

2-05-04-25

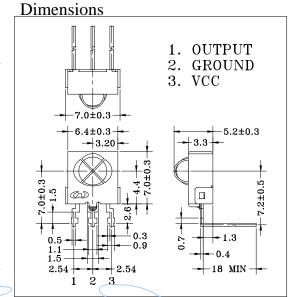

#### Module No.: PIC-1018TMB

#### 1. Features:

- Miniature size
- Built-in exclusive IC
- Wide half angle & long reception distance
- Good noise-proof capability
- High immunity against ambient light
- High protection ability to EMI
- **Back Metal Cover**
- Top view
- Mesh
- Low voltage operating: 2.4V

### 2. Applications

- AV instruments (Audio, TV, VCR, CD player)
- Home appliances (Air-conditioner, Fan, Light.)
- Remote control for wireless devices

#### Module No.: PIC-1018TMB

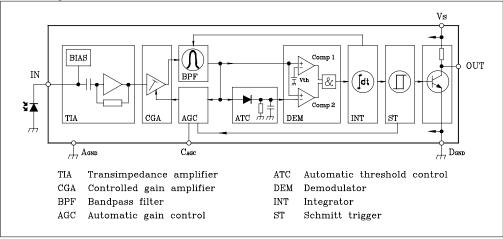

In case of noisy power supply, please serially insert  $100\Omega$  resistor and about  $47\mu F$  electrolytic capacitor in Vcc line and ground as follows:-

**Block Diagram** 

### **Standard Inspection**

Among electrical characteristics, total quantity will be inspected as below:-

- Distance between emitter and detector
- Current consumption
- H level output voltage
- L level output voltage

### Infrared Receiver Module

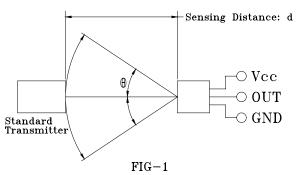

#### Module No.: PIC-1018TMB

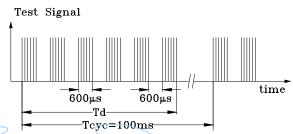

### **Testing Method**

Distance between emitter and detector specifies maximum distance that output waveform satisfies the standard (FIG-3) under the conditions below against the standard transmitter.

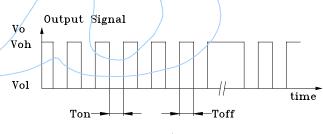

- a. Measuring place
   Indoor without extreme reflection of light.
- b. Ambient light source
  Detecting surface illumination is
  200±5Lux under ordinary white
  fluorescence lamp of no high
  frequency lightning.
- c. Standard transmitter

  Transmitter wave indicated in FIG-2 of standard transmitter is arranged to satisfy Vo≥50mVp-p under the measuring circuit specified in FIG-3

Transmitter wave indicated in Tcyc-Td>25ms is recommended for optimal function

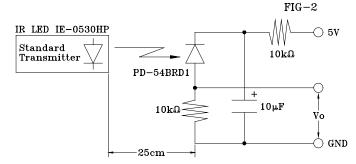

FIG-3 Power Output Measurement Circuit

### Precautions for Use

- a. Store and use where there is no force causing transformation or change in quality.
- b. Store and use where there is no corrosive gas or sea (salt) breeze.
- c. Store and use where there is no extreme humidity.
- d. Solder the lead pin within the condition of ratings. After soldering, do not add exterior force.
- e. Do not wash this device. Wipe the stains of diode side with a soft cloth. You can use the solvent, ethyl alcohol, or methyl alcohol only.
- f. To prevent static electricity damage to the pre-amp, make sure that the human body, the soldering iron are connected to ground before using.
