

Power Inductors - RFB Series

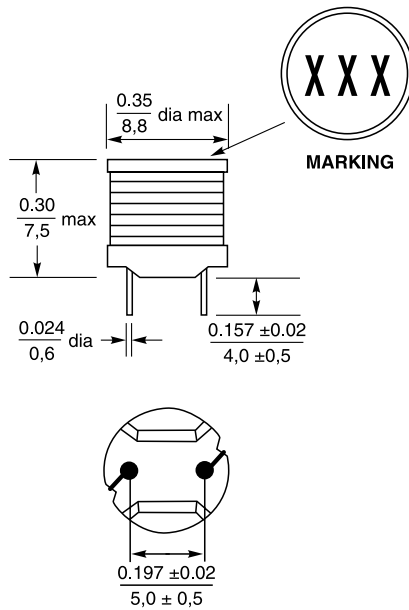

These low cost power inductors offer a wide range of inductance values, from 2.2 μH to 18 mH.

They have an open magnetic construction which gives them high current carrying capabilities. The RFB0807 Series offers the lowest profile (7,5 mm) and a standard 5 mm pin spacing. The larger RFB0810 and 1010 Series have the lowest DC resistance and highest current ratings. They also have a PVC wrap to protect the winding.

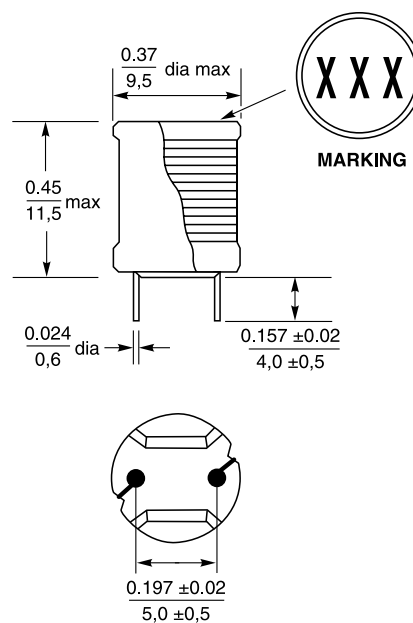

Free evaluation samples are available by contacting Coilcraft or visiting www.coilcraft.com.
