#### Description

CPC1004N is a miniature, low-voltage, low on-resistance 1-Form-A DC solid state relay in a 4-pin SOP package. The relay uses optically coupled MOSFET technology to provide 1500V<sub>rms</sub> of input/output isolation. The efficient MOSFET switch and photovoltaic die use Clare's patented OptoMOS architecture. The optically coupled input is controlled by a highly efficient GaAlAs infrared LED. The CPC1004N uses Clare's state of the art double-molded vertical construction packaging to produce one of the world's smallest relays. The CPC1004N is ideal for replacing larger, less-reliable reed and electromechanical relays.
