

TRANSCEIVER MODULE

REV. 1.0 - PRODUCT PREVIEW

1 FEATURES

- Triple-band (EGSM900 / DCS1800 / PCS1900).
- Supports data transfer applications in multi-slots GPRS class-12
- EDGE Receive capability
- Integrates:
 - BiCMOS6G RF transceiver
 - 3 Receive Band Pass filters
 - 3 Receive Matching Network between filters output & LNA input
 - PLL loop filter
 - Decoupling / DC blocking capacitors
- Insures compatibility with different Power Modules
 - STW3102 Power Module
 - Power Module coming from the competition
- RF interfaces:
 - Single-ended 50 ohms acceses
 - 3 in Rx
 - 2 in Tx
- Noise Figure in
 - Low band : 5.5 dB typ
 - High bands : 6 dB typ
- Transmit output level:
 - EGSM band : 1 or 5 dBm typ
 - DCS & PCS bands : 1 or 5 dBm typ
- Standard Rx / Tx differential I/Q analogue interface
- Supply voltage range: 2.7V min / 3.3V max
- Embedded voltage regulators to supply on chip RF functions
- Package:
 - Full lead-free
 - 104 -BGA 7 x 7 pack
- Temperature range:
 - Case operating temperature range:
 - 20°/ +70°C (fulfil specification)
- ESD handling:

- ± 2 kV Human Body Model
- Control interfaces:
 - Towards Baseband: 3-wire serial interface with a Clock (Clk), enable (En) and a data line (Data).
 - Towards Front-End functions 3 control pins

2 DESCRIPTION

In a 1.4 x 7 x 7mm low-profile Ball Grid Array package, the new modules integrate all of the key functions, requiring only a 26MHz crystal and a power amplifier module (PA+antenna switch functions) to build a complete triple-band solution from antenna to base band interface. Two versions are offered: type STw3100 addresses the European EGSM900, DCS1800, and PCS1900 bands while the STw3101 targets the US GSM850, DCS1800, and PCS1900 bands. The transceiver modules are compatible with the STMicroelectronics STw3102 power-amplifier module and most of the standard power amplifiers available on the market.
