

high pressure internal side mount

The SSF29 series is a horizontally mounted device designed to achieve reliable switching at higher pressures. Mounting is in the side of the tank from the inside, so requires access to the inside of the tank.

This type is capable of working at pressures of up to 40 bar.

They are manufactured in 316 grade Stainless Steel, for those liquids and environments that require the use of Stainless Steel and will work in liquids of SG 0.7 minimum.

The switch action may be reversed by removing the foat, inverting it and then reftting it to the stem.

- Stainless steel
- Internal mounting
- Temperature range to 120°C
- Pressure up to 40 bar
