FSUSB11 — Low-Power, Full-Speed (12Mbps) Switch

Description

compatible.

The FSUSB11 is a high-performance, dual Single-Pole

Double-Throw (SPDT) switch designed for switching

USB 1.1 signals. The device features ultra-low on resistance ($R_{ON})$ of 1.150 maximum at 4.5V V_{CC} and

 4.3Ω at 2.7V supply. High bandwidth and ultra low (R_{ON})

make this switch able to pass both USB low- and full-

speed signal with minimum signal distortion. The device is fabricated with sub-micron CMOS technology to

achieve fast switching speeds and designed for break-

before-make operation. The select input is TTL-level

Features

- Space Saving MicroPak[™] (1.6 x 2.1mm)
- USB 1.1 Signal Switching Compliant
- 3db Bandwidth: >350MHz
- Maximum 1.15 Ω R_{ON} at 4.5V V_{CC} and 4 Ω for 2.7V Supply
- 0.3Ω Maximum R_{ON} Flatness for +5V Supply
- Broad V_{CC} Operating Range: 1.65V to 5.5V
- Fast Turn-On and Turn-Off Time
- Break-Before-Make Enable Circuitry
- Over-Voltage Tolerant, TTL-Compatible Control Input

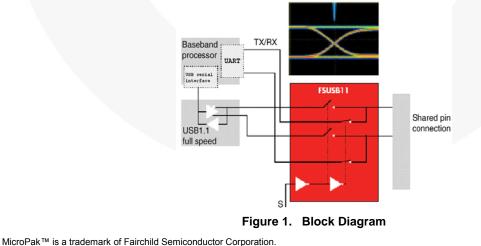

Applications

 Cell Phones, PDAs, Digital Cameras, Notebook Computers

Absolute Maximum Ratings

Stresses exceeding the absolute maximum ratings may damage the device. The device may not function or be operable above the recommended operating conditions and stressing the parts to these levels is not recommended. In addition, extended exposure to stresses above the recommended operating conditions may affect device reliability. The absolute maximum ratings are stress ratings only.

Symbol	Parameter	Min.	Max.	Unit
V _{CC}	Supply Voltage	-0.5	6.0	V
Vs	Switch Voltage	-0.5	V _{CC} + 0.5	V
V _{IN}	Input Voltage ⁽¹⁾	-0.5	6.0	V
I _{IK}	Input Diode Current	-50		mA
I _{SW}	Switch Current		200	mA
ISWPEAK	Peak Switch Current (Pulsed at 1ms Duration, <10% Duty Cycle)		400	mA
T _{STG}	Storage Temperature Range	-65	+150	°C
TJ	Maximum Junction Temperature		+150	°C
TL	Lead Temperature (Soldering, 10 Seconds)		+260	°C
ESD	Human Body Model, JESD22-A114		8	kV

Note:

1. The input and output negative voltage ratings may be exceeded if the input and output diode current ratings are observed.

Recommended Operating Conditions

The Recommended Operating Conditions table defines the conditions for actual device operation. Recommended operating conditions are specified to ensure optimal performance to the datasheet specifications. Fairchild does not recommend exceeding them or designing to Absolute Maximum Ratings.

Symbol	Parameter	Min.	Max.	Unit
V _{CC}	Power Supply	1.65	5.50	V
V _{IN}	Control Input Voltage ⁽²⁾	0	V _{CC}	V _{CC}
Vsw	Switch Input Voltage	0	Vcc	Vcc
T _A	Operating Temperature	-40	+85	°C

Note:

2. Unused inputs must be held HIGH or LOW. They may not float.

FSUSB11 — Low-Power, Full-Speed (12Mbps) Switch

DC Electrical Characteristics

Unless otherwise specified, typical values are at +25°C.

Symbol			Conditions	Vc	c (V)	т	_A =+25	°C		40 to 5°C	Units

R _{FLAT(ON)}	Un Resistance Flat	ness`	I _{OUT} =100mA, B ₀ or B ₁ =0V, 1V, 2V	4	1.5		0.2	0.3		0.4	Ω
	Quioscont Supply (Curront	V _{IN} =0V or V _{CC} ,	3	3.6		0.1	0.5		1.0	
Icc	Quiescent Supply (Juiteni	I _{OUT} =0	5	5.5		0.1	0.5		1.0	μA

Notes:

3. On resistance is determined by the voltage drop between D and Dn pins at the indicated current through the switch.

4. $\Delta R_{ON} = R_{ONmax} - R_{ONmin}$ measured at identical V_{CC}, temperature, and voltage.

5. Flatness is defined as the difference between the maximum and minimum value of on resistance over the specified range of conditions.

DISCLAIMER

FAIRCHILD SEMICONDUCTOR RESERVES THE RIGHT TO MAKE CHANGES WITHOUT FURTHER NOTICE TO ANY PRODUCTS HEREIN TO IMPROVE RELABILITY, FUNCTION, OR DESIGN, FAIRCHILD DOES NOT ASSUME ANY LIABILITY ARISING OUT OF THE APPLICATION OR USE OF ANY PRODUCT OR CIRCUIT DESCRIBED HEREIN; NEITHER DOES IT CONVEY ANY LICENSE UNDER ITS PATENT RIGHTS, NOR THE RIGHTS OF OTHERS. THESE SPECIFICATIONS DO NOT EXPAND THE TERMS OF FAIRCHILD'S WORLDWIDE TERMS AND CONDITIONS, SPECIFICALLY THE WARRANTY THEREIN, WHICH COVERS THESE PRODUCTS.

LIFE SUPPORT POLICY

FAIRCHILD'S PRODUCTS ARE NOT AUTHORIZED FOR USE AS CRITICAL COMPONENTS IN LIFE SUPPORT DEVICES OR SYSTEMS WITHOUT THE EXPRESS WRITTEN APPROVAL OF FAIRCHILD SEMICONDUCTOR CORPORATION.

As used herein:

- Life support devices or systems are devices or systems which, (a) are
 intended for surgical implant into the body or (b) support or sustain life,
 and (c) whose failure to perform when properly used in accordance
 with instructions for use provided in the labeling, can be reasonably
 expected to result in a significant injury of the user.
- A critical component in any component of a life support, device, or system whose failure to perform can be reasonably expected to cause the failure of the life support device or system, or to affect its safety or effectiveness.

ANTI-COUNTERFEITING POLICY

Fairchild Semiconductor Corporation's Anti-Counterfeiting Policy. Fairchild's Anti-Counterfeiting Policy is also stated on our external website, www.fairchildsemi.com, under Sales Support.

Counterfeiting of semiconductor parts is a growing problem in the industry. All manufacturers of semiconductor products are experiencing counterfeiting of their parts. Customers who inadvertently purchase counterfeit parts experience many problems such as loss of brand reputation, substandard performance, failed applications, and increased cost of production and manufacturing delays. Fairchild is taking strong measures to protect ourselves and our customers from the proliferation of counterfeit parts. Fairchild strongly encourages customers to purchase Fairchild parts either directly from Fairchild or from Authorized Fairchild Distributors who are listed by country on our web page died above. Products customers buy either from Fairchild directly form Authorized Fairchild Distributors are genuine parts, have full traceability, meet Fairchild's quality standards for handling and storage and provide access to Fairchild's full range of up-to-date technical and product information. Fairchild and our Authorized Distributors will stand behind all warranties and will appropriately address any warranty issues that may arise. Fairchild will not provide any warranty coverage or other assistance for parts bought from Unauthorized Sources. Fairchild is committed to combat this global problem and encourage our customers to do their part in stopping this practice by buying direct or from authorized distributors.

PRODUCT STATUS DEFINITIONS

Definition of Terms

Datasheet Identification	Product Status	Definition					
Advance Information	Formative / In Design	Datasheet contains the design specifications for product development. Specifications may change in any manner without notice.					
Preliminary	First Production	Datasheet contains preliminary data; supplementary data will be published at a later date. Fairchild Semiconductor reserves the right to make changes at any time without notice to improve design.					
No Identification Needed	Full Production	Datasheet contains final specifications. Fairchild Semiconductor reserves the right to make changes at any time without notice to improve the design.					
Obsolete	Not In Production	Datasheet contains specifications on a product that is discontinued by Fairchild Semiconductor. The datasheet is for reference information only.
