

Rack Mountable 19", 3RU Card Cage

The CC-18 Frame is a ruggedized aluminum housing unit that accepts many of our fiber optic interface cards. The mounting ears are reversible, so that card loading, as well as electrical and optical connections, can be accessed from the front or back. The regulated switching power supply has short circuit protection, and an input operating voltage of 87-264 VAC.

The Multiverse Chassis can accommodate Opticomm's Multiple Division Multiplexing (MDM) Interface Cards for higher channel video/audio/data single-fiber solutions from one-single distribution point.

System Design

- CC-18-80W: 19" 3RU Cage, 18 slots, Slide-In PS
- CC-18-RPS: 19" 3RU Cage, 14 slots Redundant Slide-In Power Supplies

Features

- MDM Series Compatible for Higher Channel Single Fiber Solutions.
- Ruggedized.
- Accommodates Redundant Power Supplies.
- Enables Easy Upgradability and Flexibility.
- Insert Cards are hot swappable while in operation
