The transistors BD 611, BD 613, BD 615, BD 617, and BD 619 are NPN silicon epibase power transistors in a plastic package similar to TO 202. The collector is electrically connected to the metallic mounting area. The transistors are particularly suitable for use in push-pull output stages, driver stages as well as for general AF applications. Their complementary types are the PNP transistors BD 612, BD 614, BD 616, BD 618, and BD 620.
