

# PC921 High Power OPIC Photocoupler

T-41-83

## ■ Features

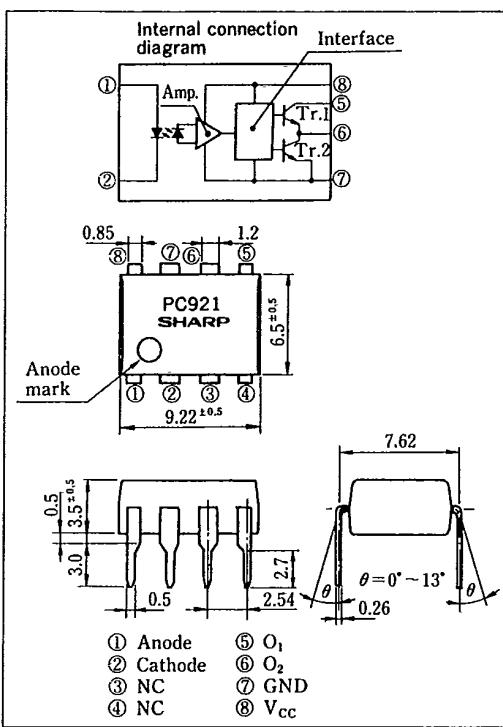

1. Built-in base amplifier for power transistor drive
2. High power ( $I_{O1}$  : MAX. 0.5A (DC)) ( $I_{O2P}$  : MAX. 2.0A (pulse))
3. High speed response ( $t_{PHL}, t_{PLH}$  : MAX. 5μs)
4. High sensitivity ( $I_{FLH}$ : MAX. 5mA)
5. UL recognized, file No. E64380

## ■ Applications

1. Inverter controlled air conditioners
2. Low capacitance general purpose inverter

## ■ Outline Dimensions

(Unit : mm)

\* OPIC is a registered trademark of Sharp and stands for Optical IC. It has a light detecting element and signal processing circuitry integrated onto a single chip.

## ■ Absolute Maximum Ratings (Unless otherwise specified, $T_a = T_{opr}$ )

|                          | Parameter                    | Symbol    | Rating     | Unit |
|--------------------------|------------------------------|-----------|------------|------|
| Input                    | Forward current              | $I_F$     | 25         | mA   |
|                          | *1 Reverse voltage           | $V_R$     | 6          | V    |
| Output                   | Supply voltage               | $V_{cc}$  | 15         | V    |
|                          | $O_1$ output current         | $I_{O1}$  | 0.5        | A    |
|                          | *2 $O_1$ peak output current | $I_{O1P}$ | 1.0        | A    |
|                          | $O_2$ output current         | $I_{O2}$  | 0.6        | A    |
|                          | *2 $O_2$ peak output current | $I_{O2P}$ | 2.0        | A    |
|                          | $O_1$ Output voltage         | $V_{O1}$  | 15         | V    |
|                          | Power dissipation            | $P_o$     | 500        | mW   |
|                          | Total power dissipation      | $P_{tot}$ | 550        | mW   |
