Set-top Box Solutions Satellite

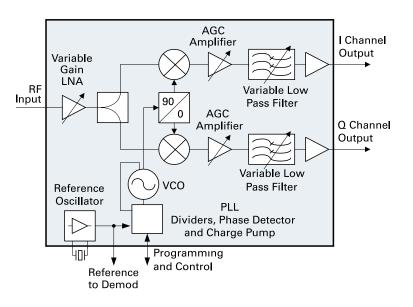

Digital Satellite Tuner CX24109

Highly Integrated, Direct Down-Conversion Satellite Tuner

Conexant's broadband communications portfolio includes a comprehensive suite of semiconductor solutions that enable the digital home and information network. Combining extensive experience in broadband systems and mixed-signal integrated circuit design, Conexant introduces the CX24109 Digital Satellite Tuner – a highly integrated, direct down-conversion satellite tuner intended for high-volume digital video, audio, and data receivers. The CX24109 consists of an LNA, variable RF attenuator, quadrature downconverter, variable IF gain amplifiers, variable low-pass filters, VCO, and synthesizer. This highly integrated satellite tuner RF IC does not require a balun, therefore simplifying RF layout and reducing the overall BOM cost.

When combined with Conexant's CX24123 QPSK demodulator/FEC decoder, the chipset provides a complete broadband satellite front-end solution capable of operating from 1 to 45 Msps in the most demanding satellite environments. The CX24109 and CX24123 provides a streamlined, cost optimized front-end solution offered in a compact design that saves valuable board space and is easy to implement.

CX24109 Block Diagram

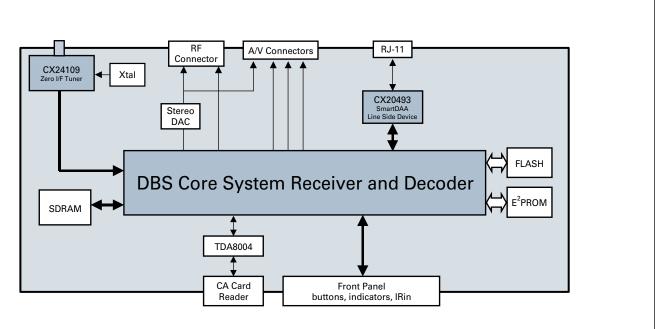

Distinguishing Features

- DVB/DSS/DCII compliant
- Single-chip RF-to-baseband satellite receiver
- Zero-IF architecture eliminates the need for image-reject filtering
- Variable baseband filters for optimal interference rejection
- Integrated LNA and LO with onboard VCO and synthesizer
- Single +5V supply
- 48-pin ETQFP

 Part Number
 CX24109

 Description
 Digital Satellite Tuner

Complete IC System Solution for Worldwide DBS Platforms

CX24109 Product Features

- Single-chip RF-to-baseband satellite receiver
- Zero-IF architecture eliminates the need for image-reject filtering
- Integrated LNA
- Integrated LO with onboard VCO and synthesizer
- Variable baseband filters for optimal
- interference rejection
- Single +5V supply

Product Specifications

- RF input: 950 to 2150 MHz
- Input power range: -20 to -81 dBm
- Noise figure: 10 dB, typical
- Input IP3 at minimum gain: 10 dBm, typical

- I/Q phase difference: ±3 degrees, typical
- I/Q amplitude difference: ±1.5 dB, typical
- Filter tune range: 0.5 to 30 MHz
- Output voltage, RL≥1kΩ: 0.5 Vp-p
- Typical junction temperature: 90° C at room temperature
- Operating temperature range: 0° to 70° C
- Package type: 48-pin ETQFP

Applications

- DBS set-top boxes
- Commercial digital video, audio and data receivers
- Digital VCRs
