Description

The Intersil HCS253MS is a Radiation Hardened 4-to-1 line selector multiplexer having three-state outputs. One of four sources for each section is selected by the common select inputs S0 and S1. When the output enable ($1\overline{OE}$ or $2\overline{OE}$) is HIGH, the output is in the high impedance state.

The HCS253MS utilizes advanced CMOS/SOS technology to achieve high-speed operation. This device is a member of radiation hardened, high-speed, CMOS/SOS Logic Family.

The HCS253MS is supplied in a 16 lead Ceramic flatpack (K suffix) or a SBDIP Package (D suffix).
