

MI-AIMTM

Military Component Front End Modules

Product Highlights

The MI-AIM AC input module interfaces directly with AC mains to provide line rectification, EMI filtering, transient protection, and inrush limiting. These military front end modules accept 115Vac and provide 250W of output power for any of Vicor's MI-x7x family of standard and junior size modules.

The MI-AIM meets CE102 conducted emissions requirements of MIL-STD-461D and the transient and spike requirements of MIL-STD-704A.

Produced in ISO 9001-registered facilities, the fully epoxy encapsulated 2.28" x 2.4" x 0.5" (57,9 x 61,0 x 12,7mm) modules meet the environmental test requirements of MIL-STD-810.

Features

- ✦ Inputs: 115Vac; 60/400Hz
- ✦ Output power: 250W
- ✦ Compatible with MI-x7x family modules
- ✦ MIL-STD-461D EMI compliance
- ✦ MIL-STD-810 environments
- ✦ MIL-STD-704A input transient protection
- ✦ 95% efficiency
- ✦ Operating temperature to 100°C
- ✦ Size: 2.28" x 2.4" x 0.5" (57,9 x 61,0 x 12,7mm)
