CMOS IC

LC74793, 74793JM

VPS / PDC Slicer IC

Preliminary

Overview

The LC74793/JM is a CMOS IC that provides PDS, VPS, and UDT data acquisition functions. The LC74793/JM supports microprocessor control of its operating modes and microprocessor read out of data acquired in any of its operating modes.

Features

- VPS data acquisition (5 or 11 to 15 bytes)
  VPS: Video Program System
- PDC (8/30/2) data acquisition (13 to 25 bytes)
  PDC: Program Delivery Control
- UDT (8/30/1) data acquisition (13 to 25 bytes)
  UDT: Unified Date and Time
- Header (X/00) data acquisition (14 to 45 bytes)
- Status display (8/30/1, 8/30/2) data acquisition (26 to 45 bytes)
- Automatic VPS/PDC discrimination mode
- Built-in AFC and sync separator circuits
- Synchronization discrimination circuit
- I²C bus support

Package Dimensions

Pin Functions

Pin No.	Pin	Function	Description
1	$V_{SS}1$	Ground	Digital system ground
2	Xtalin	Crystal oscillator connections	Connections for the crystal element and capacitors that form the crystal oscillator. Also used for external clock input (fsc, 2fsc, or 4fsc).
3	Xtalout		
4	CTRL1	Crystal element switching	Switches between external clock input mode and crystal oscillator mode. Set this pin low for crystal oscillator, and high for external clock input.
5	NC		
6	SDA	Data I/O I²C bus	PDC/VPS data I/O. I²C bus write address: 01111100 I²C bus read address: 01111101
7	SCL	Clock input I²C bus	PDC/VPS data clock input. I²C bus
8	$SYNC_{JDG}$	External synchronizing signal discrimination output	External synchronizing signal presence/absence discrimination status output. A high level is output when synchronizing signals are present. This pin outputs the crystal oscillator clock when the $\overline{RST}$ pin is low. (This reset state output can be disabled with command input.)
9	Hout	Horizontal synchronizing signal output	Horizontal synchronizing signal output
10	VSS2	Ground	Ground. (VCO circuit ground)
11	CP_{OUT}	Charge pump output	Charge pump output. Connect a low-pass filter to this pin.
12	VCO_{IN}	Oscillator control voltage input	VCO oscillation control voltage input
13	VCOR	Oscillator range adjustment	VCO oscillation range adjustment resistor connection
14	DAV	Data acquisition output	Outputs a low level when PDC/VPS data has been discriminated
15	$V_{DD}2$	Power supply (+5 V)	Power supply (+5 V) (VCO system power supply)
16	SYNin	Sync separator circuit input	Internal sync separator circuit video signal input
17	SEPC	Slice level output	Slice level verification
18	SEP_{OUT}	Composite synchronizing signal output	Internal sync separator circuit composite synchronizing signal output
19	SEP_{IN}	Vertical synchronizing signal input	Inputs the vertical synchronizing signal by integrating the SEP out pin output signal. Applications must connect the SEP out pin to this pin through an integration circuit. If unused, connect this pin to VDD1. (This pin is enabled when CTRL2 is high.)
20	Vout	Vertical synchronizing signal output	Vertical synchronizing signal output This pin outputs the VCO clock when the $\overline{RST}$ pin is low. (This reset state output can be disabled with command input.)
21	CTRL2	SEPin input control	Controls whether or not the VSYNC vertical synchronizing signal is input to the SEPin input. When low: The VSYNC signal is not input. (The internal vertical separation circuit is used.) When high: The VSYNC signal is input.
22	CDLR	Clock phase adjustment	Connection for the clock phase adjustment resistor.
23	$\overline{RST}$	Reset input	System reset input. A pull-up resistor is built in. (This input has hysteresis characteristics.)
24	$V_{DD}1$	Power supply (+5 V)	Power supply. (+5 V: digital system power supply)

Specifications

Absolute Maximum Ratings

Parameter	Symbol	Conditions	Ratings	Unit
Supply voltage	V_{DD}	$V_{DD}1$ and $V_{DD}2$	V_{SS} – 0.3 to V_{SS} + 7.0	V
Input voltage	V_{IN}	All input pins	V_{SS} – 0.3 to $V_{DD}1$ + 0.3	V
Output voltage	V_{OUT}	SDA, SYNCJDG, SEPOUT, DAV, HOUT, and VOUT	V_{SS} – 0.3 to $V_{DD}1$ + 0.3	V
Allowable power dissipation	Pd max	Ta = 25°C	350	mW
Operating temperature	Topr		–30 to +70	°C
Storage temperature	Tstg		–40 to +125	°C

Recommended Operating Conditions

Parameter	Symbol	Conditions		Ratings			Unit
				min	typ	max	
Supply voltage	$V_{DD}1$	$V_{DD}1$ and $V_{DD}2$		4.5	5.0	5.5	V
High-level input voltage	$V_{IH}1$	SDA and SCL		0.8 $V_{DD}1$		5.5	V
	$V_{IH}2$	$\overline{RST}$		0.8 $V_{DD}1$		$V_{DD}1$ + 0.3	V
	$V_{IH}3$	CTRL1 and CTRL2		0.7 $V_{DD}1$		$V_{DD}1$ + 0.3	V
Low-level input voltage	$V_{IL}1$	$\overline{RST}$, SDA, and SCL		V_{SS} – 0.3		0.2 $V_{DD}1$	V
	$V_{IL}2$	CTRL1 and CTRL2		V_{SS} – 0.3		0.3 $V_{DD}1$	V
Pull-up resistance	RPU	$\overline{RST}$		25	50	90	kΩ
Composite video signal input voltage	$V_{IN}1$	SYNIN	$V_{DD}1$ = 5 V	1.5	2.0	2.25	Vp-p
Input voltage	$V_{IN}2$	XtalIN (in external clock input mode) fin = fsc, 2fsc, or 4fsc	$V_{DD}1$ = 5 V	0.10		5.0	Vp-p
Oscillator frequency	FOSC1	The XtalIN and XtalOUT oscillator pins (4fsc: PAL)			17.734		MHz
	FOSC2	The XtalIN and XtalOUT oscillator pins (2fsc: PAL)			8.867		MHz
	FOSC3	The XtalIN and XtalOUT oscillator pins (fsc: PAL)			4.433		MHz

Note: Note that adequate measure must be taken to prevent noise from entering the XtalIN pin when it is used in clock input mode.

Electrical Characteristics at Ta = –30 to +70°C, $V_{DD}1$ = 5 V unless otherwise specified.

Parameter	Symbol	Applicable pins	Conditions	Ratings			Unit
				min	typ	max	
Output off leakage current	Ileak2	SDA and DAV				1	µA
High-level output voltage	$V_{OH}1$	SEPOUT, CPOUT, SYNCJDG, HOUT, and VOUT	$V_{DD}1$ = 4.5 V, I_{OH} = –1.0 mA	3.5			V
Low-level output voltage	$V_{OL}1$	SEPOUT, CPOUT, SYNCJDG, DAV, HOUT, and VOUT	$V_{DD}1$ = 4.5 V I_{OL} = 1.0 mA			1.0	V
	$V_{OL}2$	SDA	$V_{DD}1$ = 5.0 V I_{OL} = 3.0 mA			0.4	V
Input current	I_{IH}	$\overline{RST}$, SDA, SCL, CTRL1, CTRL2, VCOIN	$V_{IN} = V_{DD}1$			1	µA
	I_{IL}	SDA, SCL, CTRL1, CTRL2, VCOIN	$V_{IN} = V_{SS}1$	–1			µA
Operating current drain	$I_{DD}1$	$V_{DD}1$ and $V_{DD}2$	With all outputs open and a 17.734 MHz crystal			40	mA

Timing Characteristics

PDC and VPS Read and Write (I²C bus timing) at Ta = –30 to +70°C, $V_{DD}1$ = 5±0.5 V

Parameter	Symbol	Conditions	Ratings			Unit
			min	typ	max	
SCL frequency	f_{SCL}				100	kHz
Bus release time	t_{BUF}		4.7			µs
Start hold time	t_{HD}; STA		4.0			µs
SCL low-level period	t_{LOW}		4.7			µs
SCL high-level period	t_{HIGN}		4.0			µs
Data hold time	t_{HD}; DAT		0			µs
Data setup time	t_{SU}; DAT		250			ns
Rise time	t_R				1000	ns
Fall time	t_F				300	ns
Stop setup time	t_{SU}; STO		4.0			µs

Supplementary Documentation

• PDC and VPS serial timing (I²C bus timing)

Control Commands

The control commands have an 8-bit serial input format. Commands consist of a command identification code in the first byte and data in the following bytes.
Command 0: Clock control command
Command 1: VPS/PDC control command 1
Command 2: VPS/PDC control command 2
Command 3: Synchronizing signal detection command 1
Command 4: Synchronizing signal detection command 2
Command 5: Output control command 1
Command 6: Output control command 2
Command 7: VPS/PDC control command 3
Command 8: VPS/PDC control command 4
Command 9: VPS/PDC control command 5
Command 10: VPS/PDC control command 6

Display Control Commands: I ^{2}C Write

Command	First byte								Second byte							
	Command ID code				Data				Data							
	7	6	5	4	3	2	1	0	7	6	5	4	3	2	1	0

COMMAND8 (VPS/PDC control 4)	1	1	1	1	1	0	0	0	0	ECP 19	ECP 18	ECP 17	ECP 16	ECP 15	ECP 14	ECP 13
COMMAND9 (VPS/PDC control 5)	1	1	1	1	1	0	0	1	0	0	ECP 25	ECP 24	ECP 23	ECP 22	ECP 21	ECP 20
COMMAND10 (VPS/PDC control 6)	1	1	1	1	1	0	1	0	0	HXA LL2	LKA SLC	MSK H1	KMW	SLH 3	SLH 2	SLH 1

Once written, the first byte command identification code is retained until the next first byte is written.
Data is written in second byte only continuous mode. (Automatic increment)

- Specifications of any and all SANYO products described or contained herein stipulate the performance, characteristics, and functions of the described products in the independent state, and are not guarantees of the performance, characteristics, and functions of the described products as mounted in the customer's products or equipment. To verify symptoms and states that cannot be evaluated in an independent device, the customer should always evaluate and test devices mounted in the customer's products or equipment.
- SANYO Electric Co., Ltd. strives to supply high-quality high-reliability products. However, any and all semiconductor products fail with some probability. It is possible that these probabilistic failures could give rise to accidents or events that could endanger human lives, that could give rise to smoke or fire, or that could cause damage to other property. When designing equipment, adopt safety measures so that these kinds of accidents or events cannot occur. Such measures include but are not limited to protective circuits and error prevention circuits for safe design, redundant design, and structural design.
- In the event that any or all SANYO products (including technical data, services) described or contained herein are controlled under any of applicable local export control laws and regulations, such products must not be exported without obtaining the export license from the authorities concerned in accordance with the above law.
- No part of this publication may be reproduced or transmitted in any form or by any means, electronic or mechanical, including photocopying and recording, or any information storage or retrieval system, or otherwise, without the prior written permission of SANYO Electric Co., Ltd.
- Any and all information described or contained herein are subject to change without notice due to product/technology improvement, etc. When designing equipment, refer to the "Delivery Specification" for the SANYO product that you intend to use.
- Information (including circuit diagrams and circuit parameters) herein is for example only; it is not guaranteed for volume production. SANYO believes information herein is accurate and reliable, but no guarantees are made or implied regarding its use or any infringements of intellectual property rights or other rights of third parties.

This catalog provides information as of December, 1998. Specifications and information herein are subject to change without notice.
