

**8-bit D/A Converter Supporting with I<sup>2</sup>C Bus**

**Description**

The CXA1315M/P is developed as a 5-channel 8-bit D/A converter supporting with I<sup>2</sup>C bus.

**Features**

- Serial control through I<sup>2</sup>C bus
- 5-channel 8-bit D/A converter
- Built-in 4 general-purpose I/O ports (Digital I/O)
- I/O can be specified to respective ports independently
- Selection of 8 slave addresses possible through address select pins (3 pins)

**Applications**

The IC, which cannot support I<sup>2</sup>C bus, can support it by connecting its control pin to the CXA1315M/P.

**Structure**

Bipolar silicon monolithic IC

**Absolute Maximum Ratings (Ta = 25°C)**

- Supply voltage                    V<sub>CC</sub>        12        V
- Operating temperature        T<sub>opr</sub>    -20 to +75 °C
- Storage temperature         T<sub>stg</sub>   -65 to +150 °C
- Allowable power dissipation P<sub>D</sub>        960     mW

**Operating Conditions**

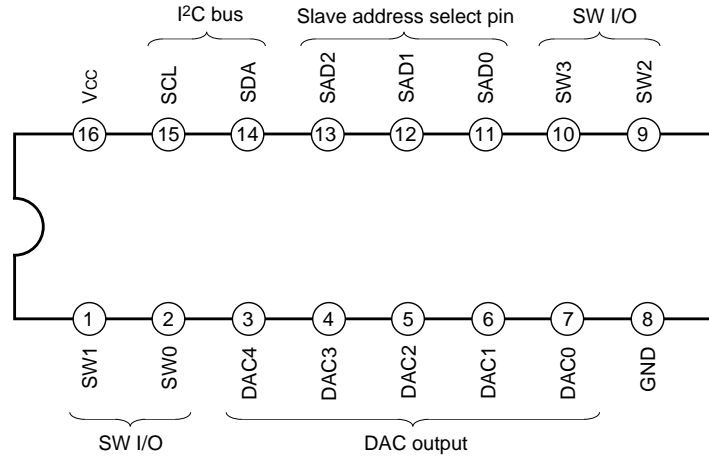

- Supply voltage                    V<sub>CC</sub>        8.2 to 9.8    V
- Operating temperature        T<sub>opr</sub>    -20 to +75 °C

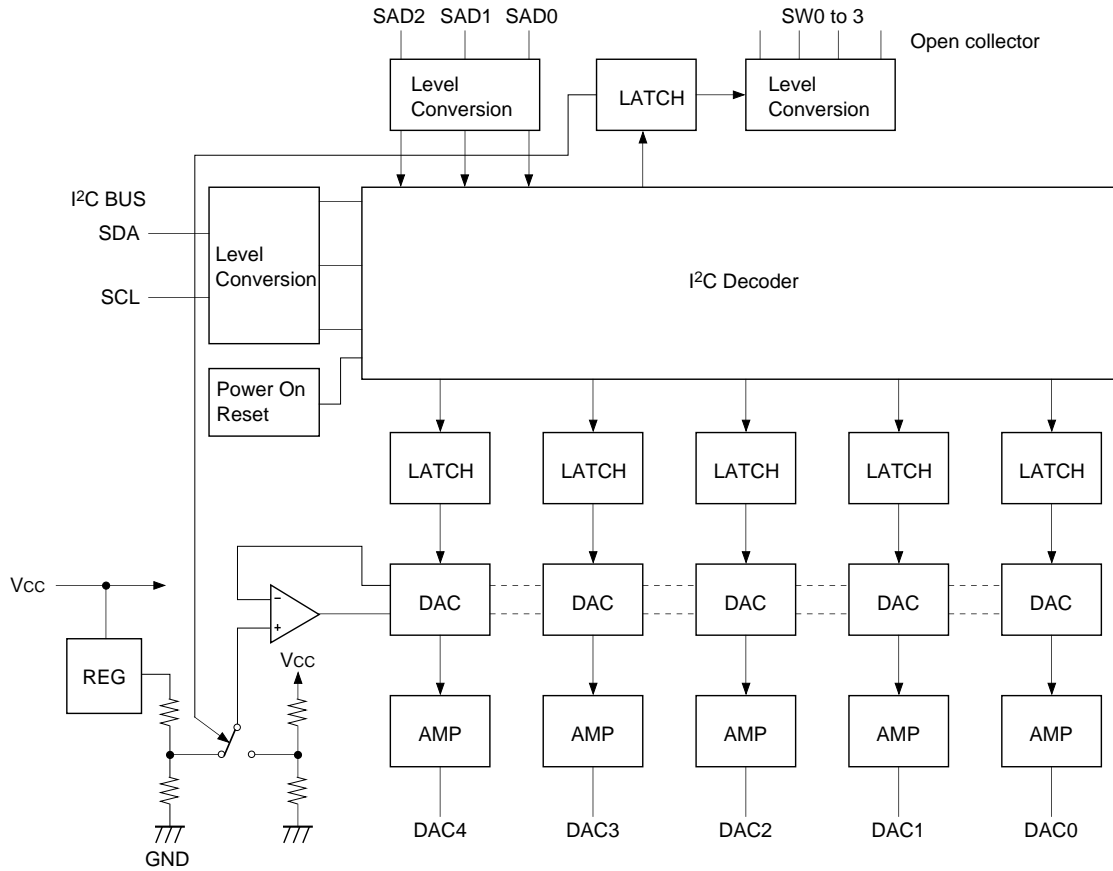

Purchase of Sony's I<sup>2</sup>C components conveys a license under the Philips I<sup>2</sup>C Patent Rights to use these components in an I<sup>2</sup>C system, provided that the system conforms to the I<sup>2</sup>C Standard Specifications as defined by Philips.

Sony reserves the right to change products and specifications without prior notice. This information does not convey any license by any implication or otherwise under any patents or other right. Application circuits shown, if any, are typical examples illustrating the operation of the devices. Sony cannot assume responsibility for any problems arising out of the use of these circuits.

**Definition of I<sup>2</sup>C Bus Register**

**<Slave address>**

**<Register table>**

- With the IC reset all registers are reset to "0"
- \*: Not defined
- x: Don't care
- Sub address is auto incremented
- It can be used as a 6-bit D/A converter by setting the lower two bits of DAC0 to 4 registers to "0", but take care that the max. voltage of DA output will lower about 100mV compared with the use of 8 bits.

**Control Register**

Sub address	Bit 7	Bit 6	Bit 5	Bit 4	Bit 3	Bit 2	Bit 1	Bit 0
x x x x x 0 0 0	REF	*	*	*	SW3	SW2	SW1	SW0
x x x x x 0 0 1	DAC0 (8)							
x x x x x 0 1 0	DAC1 (8)							
x x x x x 0 1 1	DAC2 (8)							
x x x x x 1 0 0	DAC3 (8)							
x x x x x 1 0 1	DAC4 (8)							

**Status Register**

Bit 7	Bit 6	Bit 5	Bit 4	Bit 3	Bit 2	Bit 1	Bit 0
PONRES	0	0	0	ST3	ST2	ST1	ST0

<Registers> In brackets ( ) number of bits

- REF (1) : Switches D/A converter reference voltage  
 0: Standardizes the inner regulator  
 1: Standardizes voltage resistance divided from Vcc
- SW0 to 3 (1) : Selects ON/OFF of Pins 1, 2, 9 and 10  
 (Each pin is the open collector output of NPN transistor)  
 0: OFF  
 1: ON
- DAC0 to 4 (8) : Digital data input register of D/A converter  
 0: Output voltage turns to minimum  
 255: Output voltage turns to maximum
- PONRES (1) : Detects POWER ON RESET  
 0: Master passes from the bus and is reset to "0" after having read this status  
 1: Sets to "1" when power supply is turned on or when there has been a power dip
- ST0 to 3 (1) : Detects and registers the voltage condition of Pins 1, 2, 9 and 10  
 0: 1.5V and below  
 1: 3.0V and above  
**Note)** SW0 to 3 effective during "0"

## I<sup>2</sup>C Bus Signal

There are 2 signals in I<sup>2</sup>C bus. SDA (Serial Data) and SCL (Serial Clock).

SDA is double-way.

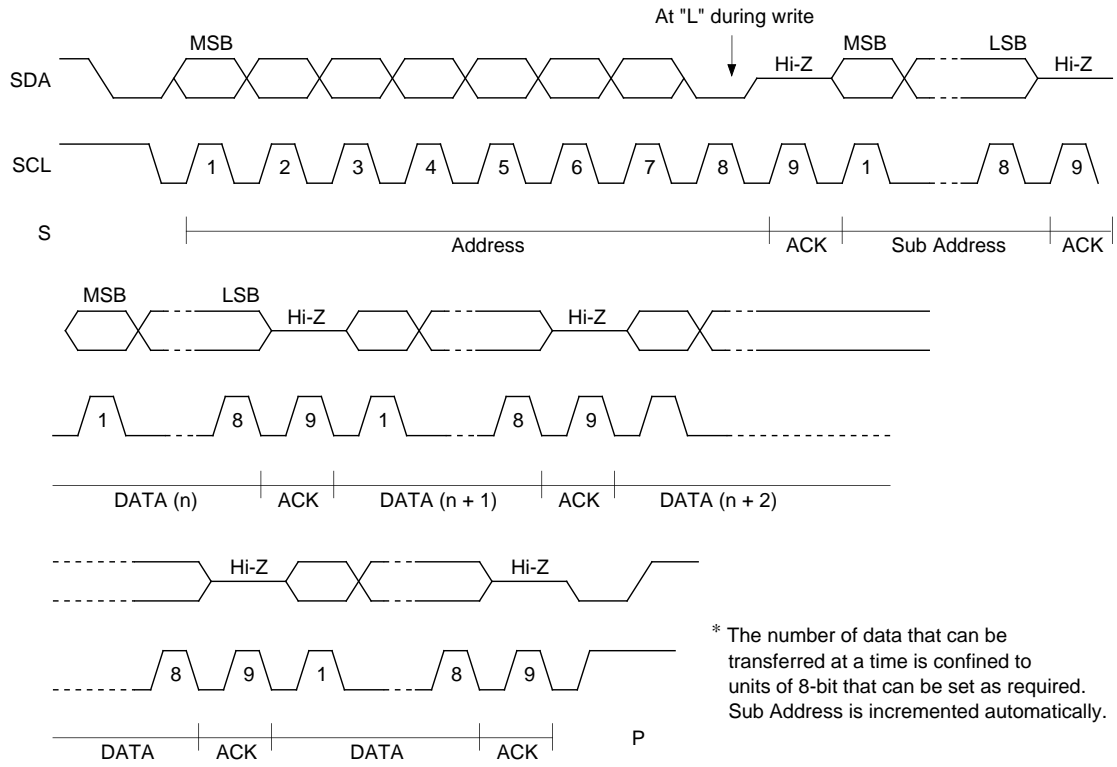

- As SDA is bidirectional it has 3 state outputs, H, L and Hi-Z.

- I<sup>2</sup>C transfer begins with Start Condition and ends with Stop Condition.

• I<sup>2</sup>C data write (Write from I<sup>2</sup>C controller to IC)

• I<sup>2</sup>C data read (Read from IC to I<sup>2</sup>C controller)

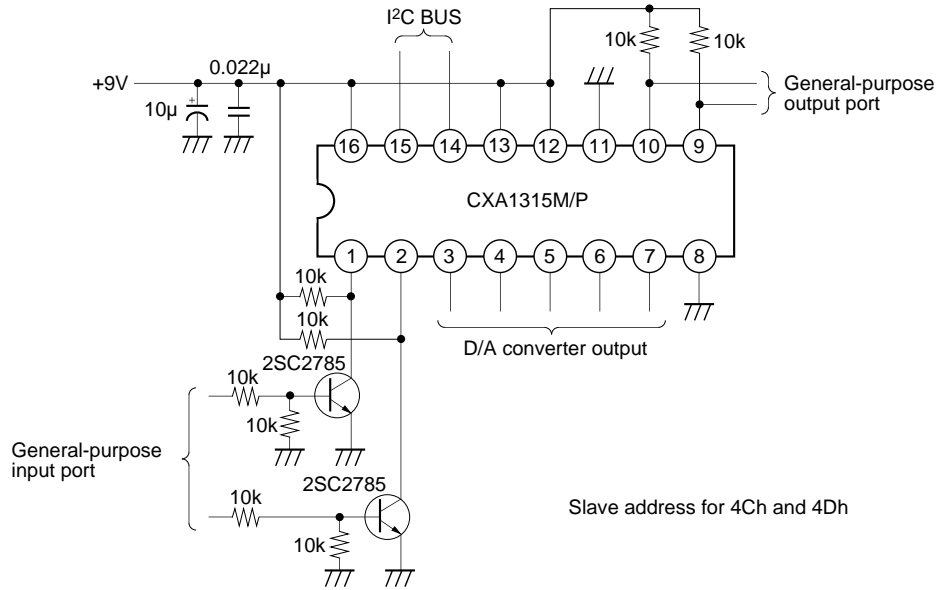

• Read timing

\* Data read is performed with SCL rise.

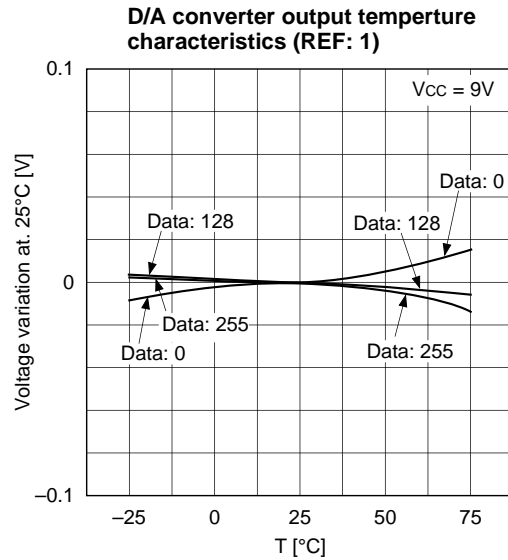

Application Circuit

Application circuits shown are typical examples illustrating the operation of the devices. Sony cannot assume responsibility for any problems arising out of the use of these circuits or for any infringement of third party patent and other right due to same.
