# HA17800V/VP/VPJ Series

## 3-terminal Fixed Voltage Regulators

# HITACHI

---

### Description

HA17800V series is positive output 1 A three-terminal regulator IC. Which features are as follows. It is designed to suit to the power supply of various equipments and to stabilize the multi switching regulator voltage, and to supply power to some kind of control devices.

### Features

- High ripple rejection ratio up to high frequency  
( $f = 20$  kHz): 60 dB(in the case of HA17805V/VP/VPJ)
- Protected against oscillation
- Regulated output voltage against temperature  
( $0 < T_a < 125^\circ\text{C}$ , 80 ppm/ $^\circ\text{C}$  typ)
- Hard to breakdown against irrelevant connection
- Built-in circuits as over current control circuit, temperature protection circuit, and area of safety operation control circuit

	$\delta V_{OLoad2}$	—	86	240	mV	$T_j = 25^\circ\text{C}, 250 \text{ mA} \leq I_{OUT} \leq 750 \text{ mA}$
Quiescent current	$I_Q$	0.8	3.7	7.4	mA	$T_j = 25^\circ\text{C}, I_{OUT} = 0$
Quiescent current change	$\delta I_{Q1}$	—	—	1.0	mA	$27 \text{ V} \leq V_{IN} \leq 38 \text{ V}$
	$\delta I_{Q2}$	—	—	0.5	mA	$5 \text{ mA} \leq I_{OUT} \leq 1.0 \text{ A}$
Voltage drop	$V_{drop}$	—	2.0	2.5	V	$T_j = 25^\circ\text{C}, I_{OUT} = 1.0 \text{ A}$
Ripple rejection ratio	$R_{REJ}$	—	50	—	dB	$T_j = 25^\circ\text{C}, f = 10 \text{ kHz}$
Temperature coefficient of output voltage	$\delta V_{OUT}/\delta T_a$	—	-1.2	—	mV/°C	$I_{OUT} = 5 \text{ mA}$
Output noise voltage	$V_n$	—	570	—	$\mu\text{V}_{rms}$	$T_j = 25^\circ\text{C}, 10 \text{ Hz} \leq f \leq 100 \text{ kHz}$
Output short circuit current	$I_{OS}$	—	0.25	—	A	$T_j = 25^\circ\text{C}$
Peak output current	$I_{op}$	—	2.0	—	A	$T_j = 25^\circ\text{C}$

## Characteristic Curves

Package Dimensions

Unit: mm

Hitachi Code	TO-220AB
JEDEC	Conforms
EIAJ	Conforms
Mass (reference value)	1.8 g

## Cautions

1. Hitachi neither warrants nor grants licenses of any rights of Hitachi's or any third party's patent, copyright, trademark, or other intellectual property rights for information contained in this document. Hitachi bears no responsibility for problems that may arise with third party's rights, including intellectual property rights, in connection with use of the information contained in this document.
2. Products and product specifications may be subject to change without notice. Confirm that you have received the latest product standards or specifications before final design, purchase or use.
3. Hitachi makes every attempt to ensure that its products are of high quality and reliability. However, contact Hitachi's sales office before using the product in an application that demands especially high quality and reliability or where its failure or malfunction may directly threaten human life or cause risk of bodily injury, such as aerospace, aeronautics, nuclear power, combustion control, transportation, traffic, safety equipment or medical equipment for life support.
4. Design your application so that the product is used within the ranges guaranteed by Hitachi particularly for maximum rating, operating supply voltage range, heat radiation characteristics, installation conditions and other characteristics. Hitachi bears no responsibility for failure or damage when used beyond the guaranteed ranges. Even within the guaranteed ranges, consider normally foreseeable failure rates or failure modes in semiconductor devices and employ systemic measures such as fail-safes, so that the equipment incorporating Hitachi product does not cause bodily injury, fire or other consequential damage due to operation of the Hitachi product.
5. This product is not designed to be radiation resistant.
6. No one is permitted to reproduce or duplicate, in any form, the whole or part of this document without written approval from Hitachi.
7. Contact Hitachi's sales office for any questions regarding this document or Hitachi semiconductor products.
