## DATA SHEET

### Monolithic Linear IC LA74322LP — Audio I/O Interface for Cell Phone

#### Overview

The LA74322LP is an audio I/O interface IC for cell phones that integrates, on a single chip, amplifiers for a monaural speaker, EVR stereo headphone, internal and external microphones, and a receiver speaker.

#### Features

- INT & EXT MIC amplifiers selectable (MIC power supply built-in)
- ALC amplifier (ALC level: 3 levels selectable)
- Base band/audio source input selector switch
- ALC (through switch, ALC level: 4 levels selectable)
- EVR stereo headphone amplifier
- Monaural speaker amplifier
- Receiver speaker amplifier (mono) standby control
- I<sup>2</sup>C bus supported (first mode)

#### Specifications

**Maximum Ratings** at Ta=25°C

Parameter	Symbol	Conditions	Ratings	Unit
Supply voltage	V <sub>CC</sub> max		5.5	V
Allowable power dissipation	P <sub>d</sub> max	Ta≤70°C, Mounted on a specified board *1	TBD	mW
Operating temperature	T <sub>opr</sub>		-20 to +70	°C
Storage temperature	T <sub>stg</sub>		-55 to +150	°C

\*1: Mounted on a specified board: TBD

■ Any and all SANYO Semiconductor Co.,Ltd. products described or contained herein are, with regard to "standard application", intended for the use as general electronics equipment (home appliances, AV equipment, communication device, office equipment, industrial equipment etc.). The products mentioned herein shall not be intended for use for any "special application" (medical equipment whose purpose is to sustain life, aerospace instrument, nuclear control device, burning appliances, transportation machine, traffic signal system, safety equipment etc.) that shall require extremely high level of reliability and can directly threaten human lives in case of failure or malfunction of the product or may cause harm to human bodies, nor shall they grant any guarantee thereof. If you should intend to use our products for applications outside the standard applications of our customer who is considering such use and/or outside the scope of our intended standard applications, please consult with us prior to the intended use. If there is no consultation or inquiry before the intended use, our customer shall be solely responsible for the use.

■ Specifications of any and all SANYO Semiconductor Co.,Ltd. products described or contained herein stipulate the performance, characteristics, and functions of the described products in the independent state, and are not guarantees of the performance, characteristics, and functions of the described products as mounted in the customer's products or equipment. To verify symptoms and states that cannot be evaluated in an independent device, the customer should always evaluate and test devices mounted in the customer's products or equipment.
