InstallationSheet

3 Phase RHP - Hybrid Solid State Contactors

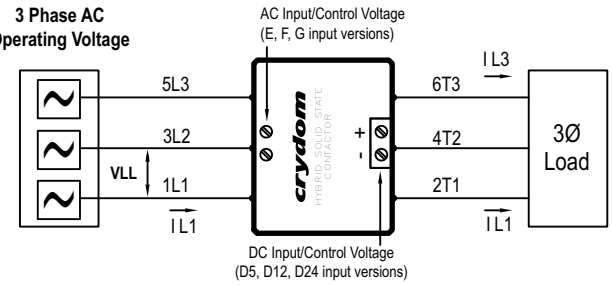
Typical Electrical Connection for 3 Phase Applications [5]

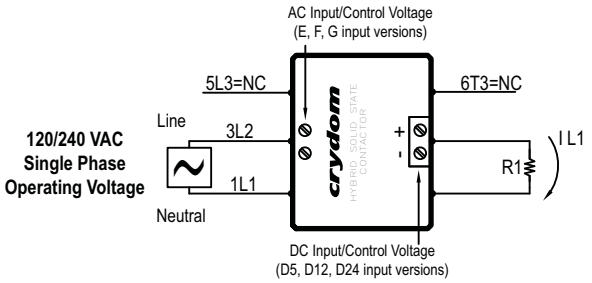
(For output voltage options 24, 28, 60)



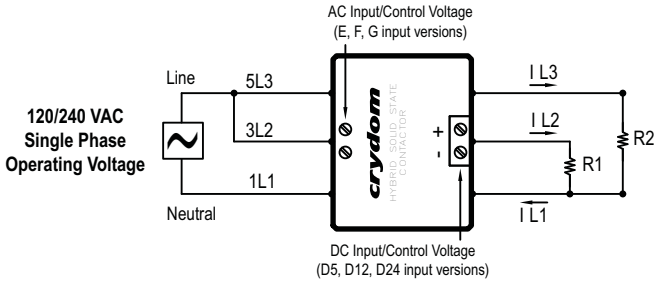
DO NOT apply any AC voltage to contactor coil connections, for DC versions only.

Optional Electrical Connections for Single Phase Applications [6]

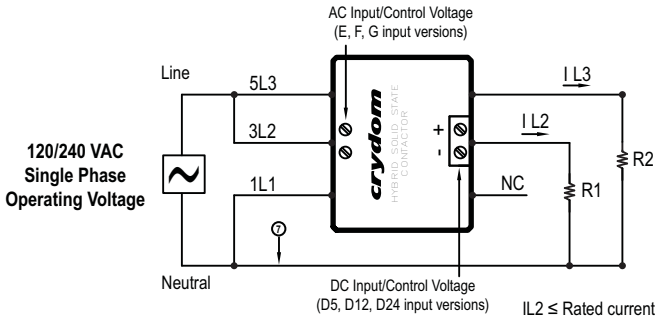
(For output voltage options 12, 24, 28, 60)



IL1 ≤ Rated current



IL1 = (IL2 + IL3) ≤ Rated current



IL2 ≤ Rated current
IL3 ≤ Rated current
IL2 + IL3 > Rated current

[5] Match VLL to voltage suffixes 28 & 60 for options E, F & G and 12 & 24 for options DX.
[6] The single phase supply voltage must be wired to terminal 1L1 and 3L2 for proper single phase operation.
[7] In applications switching two single phase loads (R1 and R2) where the combined load current exceeds the contactor's rating (40 or 50 Amps) the return/neutral lead must not be wired through the contactor (see above drawing).
