

## Features

- Attenuation: 0.5 dB Steps to 15.5 dB
- Single Positive Supply
- Contains Internal DC to DC Converter
- Low DC Power Consumption
- Small Footprint, JEDEC Package
- Integral TTL Driver
- 50 ohm Impedance
- Lead-Free CSP-1 Package
- 100% Matte Tin Plating over Copper
- Halogen-Free "Green" Mold Compound
- 260°C Reflow Compatible
- RoHS\* Compliant Version of AT90-1283

## Description

M/A-COM's MAATCC0014 is a GaAs FET 5-bit digital attenuator with integral TTL driver. Step size is 0.5 dB providing a 15.5 dB total attenuation range. This device is in an PQFN plastic surface mount package. The MAATCC0014 is ideally suited for use where accuracy, fast speed, very low power consumption and low costs are required. For dual supply designs without switching noise, use MAAD-007081-000100.

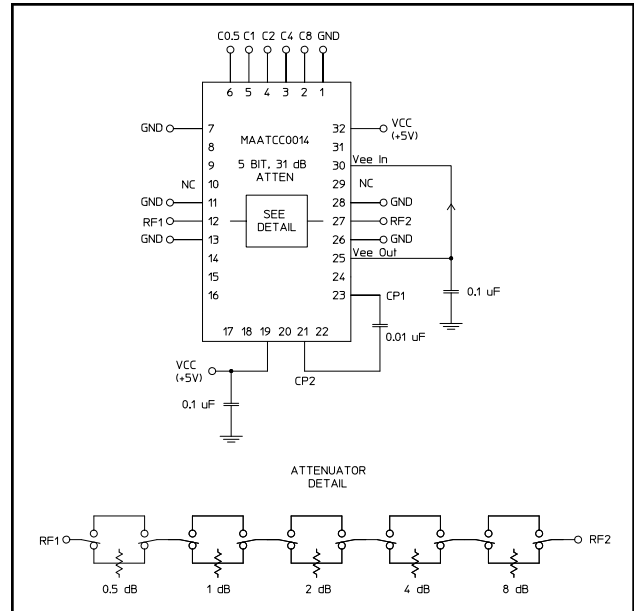

## Ordering Information

| Part Number   | Package           |
|---------------|-------------------|
| MAATCC0014    | Bulk Packaging    |
| MAATCC0014TR  | 1000 piece reel   |
| MAATCC0014-TB | Sample Test Board |

Note: Reference Application Note M513 for reel size information.

\* Restrictions on Hazardous Substances, European Union Directive 2002/95/EC.

## Schematic with Off-Chip Components

## Pin Configuration<sup>3</sup>

| Pin No. | Function        | Pin No. | Function                     |
|---------|-----------------|---------|------------------------------|
| 1       | GND             | 17      | NC                           |
| 2       | C8              | 18      | NC                           |
| 3       | C4              | 19      | Vcc                          |
| 4       | C2              | 20      | NC                           |
| 5       | C1              | 21      | Cp                           |
| 6       | C0.5            | 22      | NC                           |
| 7       | GND             | 23      | Cp                           |
| 8       | NC              | 24      | NC                           |
| 9       | NC              | 25      | V <sub>EE</sub> <sup>2</sup> |
| 10      | NC <sup>1</sup> | 26      | GND                          |
| 11      | GND             | 27      | RF2                          |
| 12      | RF1             | 28      | GND                          |
| 13      | GND             | 29      | NC <sup>1</sup>              |
| 14      | NC              | 30      | V <sub>EE</sub> <sup>2</sup> |
| 15      | NC              | 31      | NC                           |
| 16      | NC              | 32      | Vcc                          |

1. Pins 10 and 29 must be isolated.
2. V<sub>EE</sub> is produced internally and requires a .1 μF cap to GND. Generated noise is typical of switching DC-DC Converters.
3. The exposed pad centered on the package bottom must be connected to RF and DC ground. (For PQFN Packages)

| $\Delta I_{CC}$<br>(Additional Supply Current<br>Per TTL Input Pin) | $V_{CC} = \text{Max}$ , $V_{cntrl} = V_{CC} - 2.1 \text{ V}$                                   | —  | mA                 | —           | —           | 1.0  |
| Switching Noise   | Generated from<br>DC-DC Converter with<br>recommended capacitors                               | 3.5 MHz                                      | dBm                | —           | -93         | —  |
| Thermal Resistance $\theta_{jc}$                                    | —  | —  | $^\circ\text{C/W}$ | —           | 15          | —  |

- During turn-on, the device requires an initial start up current ( $I_{CC}$ ) specified as "Turn-on Current". Once operational,  $I_{CC}$  will drop to the specified levels.
- The DC-DC converter is guaranteed to start in 100  $\mu\text{s}$  as long as the power supplies have the maximum turn-on current available for start-up.

## Absolute Maximum Ratings <sup>6,7</sup>

| Parameter                                     | Absolute Maximum                                     |
|---|--|
| Max. Input Power<br>0.05 GHz<br>0.5 - 3.5 GHz | +27 dBm<br>+34 dBm                                   |
| $V_{CC}$                                      | $-0.5\text{V} \leq V_{CC} \leq +6.0\text{V}$         |
| $V_{in}^8$                                    | $-0.5\text{V} \leq V_{in} \leq V_{CC} + 0.5\text{V}$ |
| Operating Temperature                         | $-40^\circ\text{C}$ to $+85^\circ\text{C}$           |
| Storage Temperature                           | $-65^\circ\text{C}$ to $+125^\circ\text{C}$          |

- Exceeding any one or combination of these limits may cause permanent damage to this device.
- M/A-COM does not recommend sustained operation near these survivability limits.
- Standard CMOS TTL interface, latch-up will occur if logic signal is applied prior to power supply.

## Handling Procedures

Please observe the following precautions to avoid damage:

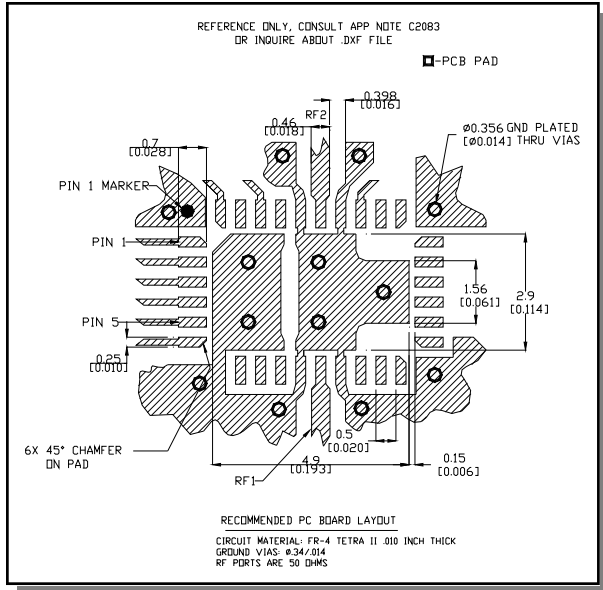

## Static Sensitivity

Gallium Arsenide Integrated Circuits are sensitive to electrostatic discharge (ESD) and can be damaged by static electricity. Proper ESD control techniques should be used when handling these devices.

## Moisture Sensitivity

The MSL rating for this part is defined as Level 2 per IPC/JEDEC J-STD-020. Parts shall be stored and/or baked as required for MSL Level 2 parts.

## Recommended PCB Configuration<sup>9</sup>
