DESCRIPTION

NEC's UPG183GR is intended for use in Direct Broadcast Satellite (DBS) applications within the Low Noise Block (LNB) down converter, for systems where at least two LNB outputs are required. It offers four intermediate frequency amplifier channels that can independently select 1 of 4 IF inputs. It is housed in a very small 16 pin plastic HTSSOP package, available on tape-and-reel, easy to install and contributes to miniaturizing the systems.
