

MN4072B / MN4072BS

Dual 4-Input OR Gates

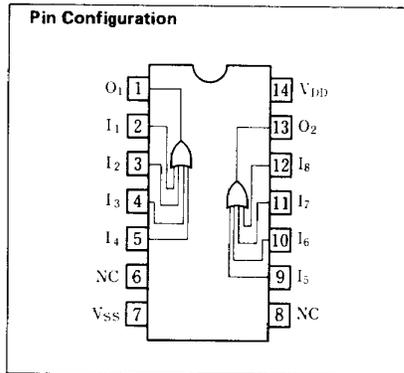

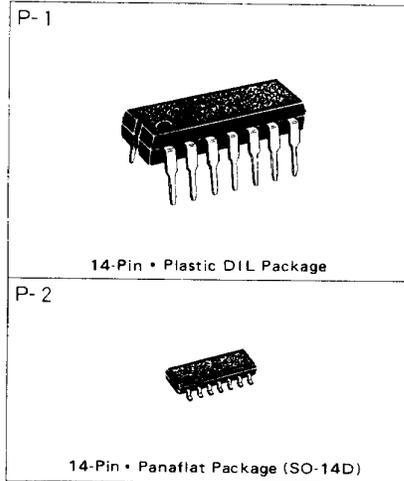

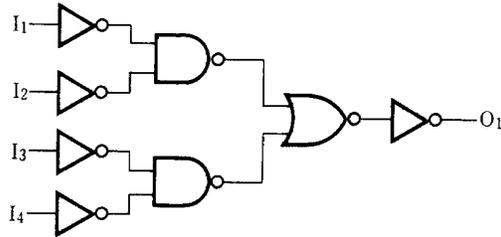

■ Description

The MN4072B/S are positive 4-input OR gates and have 2 circuits in a package.

The outputs are fully buffered to improve the propagation characteristics between the input and output which are affected by increasing load capacitance and minimizes propagation delay time. Their primary use is where low power dissipation and/or high noise immunity is desired.

The MN4072B/S are equivalent to MOTOROLA MC14072B and RCA CD4072B.
