

Digital transistors

Features

 Built-in bias resistors enable the configuration of an inverter circuit without connecting external input resistors (see equivalent circuit).
The bias resistors consist of thinfilm resistors with complete isolation to allow negative biasing of the input. They also have the advantage of almost completely eliminating parasitic effects.

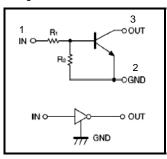

3)Only the on/off conditions need to be set for operation, making device design easy.

Modeclare that the material of product compliance with **RS**I requirements.

•Structure NPN digital transistor (Built-in resistor type)

Driver Marking	
LDTD123ELT1G= F22

Storage Conditions

Temperature: 5 to 40 Deg.C (20 to 30 Deg. C is preferred) Humidity: 30 to 80 RH (40 to 60 is preferred) Recommended Period: One year after manufacturing (This recommended period is for the soldering condition only. The characteristics and reliabilities of the products are not restricted to this limitation)

Shipment Specification

360KPCS/Carton 960KPCS/Carton (SOT-723,SOD-723)
