● Part Numbering

CERALOCK® (MHz)

(Global Part Number)

CS	T	CV	16M0	X53	***	-R0
①	②	③	④	⑤	⑥	⑦

① Product ID

Product ID	
CS	Ceramic Resonators

② Frequency/Capacitance

Code	Frequency/Capacitance
A	MHz No capacitance built-in
T	MHz Built-in Capacitance

③ Structure/Size

Code	Structure/Size
LA	Lead Type
LS	Round Lead Type
CC	Cap Chip Type
CR/CE/CG	Small-cap Chip Type
CV	Monolithic Chip Type
CW	Small Monolithic Chip Type

④ Nominal Center Frequency

Expressed by four-digit alphanumerics. The unit is in hertz (MHz).
Decimal point is expressed by capital letter "M".

⑤ Design

Code	Design
G□□	Thickness Shear mode
TV□□	Thickness Expander mode
X□□	Thickness Expander mode (3rd overtone)

□□ indicates initial frequency tolerance and load capacity.

CERALOCK® (kHz)

Ceramic Resonators (CERALOCK[®])

Chip Type Three-Terminals CSTCC/E/G/R/V/W Series

Chip "CERALOCK" with built-in load capacitance in an extremely small package.
MURATA's package technology expertise has enabled the development of the Chip "CERALOCK" with built-in load capacitors.
High-density mounting can be realized because of the small package and the elimination of the need for an external load capacitor.

■ Features

1. Oscillation circuits do not require external load capacitors.
2. The series is available in a wide frequency range.
3. The resonators are extremely small and have a low profile.
4. No adjustment is necessary for oscillation circuits.

■ Applications

- Clock oscillators for microprocessors.
- Electronic control circuits for small electronic equipment such as hand held movie.
- Audio-visual applications (Camcorder, Remote Controller, etc.)
- Office automation equipments (DVD, CD-ROM, HDD, FDD, etc.)
- Automotive electronics. (CSTCC_G_A series, CSTCR_G_A series, CSTCE_G_A series, CSTCV_X_Q series)
- Dual Tone Multi Frequency (DTMF) generator for cordless telephones.

CSTCC_G(A)
2.00-3.99MHz

CSTCR_G(A)
4.00-7.99MHz

CSTCE_G(A)

Ceramic Resonators (CERALOCK®)

Chip Type Two-Terminals CSACV/W Series

Wide range of chip "CERALOCK" is now available. This diverse series owes its development to MURATA's package technology expertise and original mass production techniques. It enables high-density mounting and further miniaturization of electronic equipment.

■ Features

1. The series is available in a wide frequency range.
2. The resonators are extremely small and have a low profile. (CSACW series)
3. No adjustment is necessary for oscillation circuits.

■ Applications

- Clock oscillators for microprocessors.
- Electronic control circuits for small electronic equipment.
- Automotive electronics. (CSACV_X_Q series)

CSACV_X_Q
14.70-70.00MHz

CSACW_X

MHz Chip Type Notice (Soldering and Mounting)

1. Soldering Condition

(1) Reflow

One heat stress shown in the right profile is applied to resonator, then being place in natural condition for 1 hour, resonator shall be measure.

1. Pre-heating conditions shall be +140 to +160°C for 60 to 120 seconds. Ascending time up to +150°C shall be longer than 30 second.
2. Heating conditions shall be within 20 seconds at +230°C min., but peak temperature shall be lower than +240°C.

(2) Soldering Iron

Soldering iron of +270±5°C shall be placed 0.5mm above from electrode of resonator. Melting solder through soldering iron shall be applied to electrode for 3±1 seconds, then being place in natural condition for 24 hour, resonator shall be measured.

2. Wash

Some series are not withstand washing.
Please check the right list before use.

(1) Cleaning Solvent

HCFC, Isopropanol, Tap water, Demineralized water, Cleanthrough750H, Pine alpha 100S, Techno care FRW

(2) Temperature Difference : dT *1

$dT \leq 60^\circ\text{C}$ (dT=Component-solvent)

*1 ex. In case the component at +90°C immerses into cleaning solvent at +60°C, then $dT=30^\circ\text{C}$.

Series	Wash
CSTCC (Except 2.00-3.49MHz)	Available
CSTCV	Available
CSACV	Available
CSTCR	Not Available
CSTCC (Only 2.00-3.49MHz)	Not Available
CSTCW	Not Available
CSACW	Not Available
CSTCE	Not Available
CSTCG	Not Available

*All automotive types are Available.

(3) Condition

1. Ultrasonic Wash

1 minute max. in above solvent at +60°C max.
(Frequency : 28kHz, Output : 20W/L)

2. Immersion Wash

5 minutes max. in above solvent at +60°C max.

3. Shower or Rinse Wash

5 minutes max. in above solvent at +60°C max.

(4) Drying

5 minutes max. by air blow at +80°C max.

(5) Others

1. Total washing time should be within 10 minutes.
2. Please insure the component is thoroughly evaluated in your application circuit.
3. The component may be damaged if it is washed with chlorine, petroleum, or alkali cleaning solvent.

MHz Chip Type Notice

■ Notice (Storage and Operating Conditions)

CSTCC_G

Please do not apply excess mechanical stress to the component and terminals at soldering.

The component is recommended with placement machines with employ optical placement capabilities.

The component might be resulted in damage by excessivemechanical force. Please make sure that you have evaluated by using placementmachines before going into mass production. Do not use placement machines whichutilize mechanical positioning. Please contact Murata for details beforehand.

1. CSTCC_G (2.00MHz-3.49MHz)

Conformal coating or washing to the component is not acceptable. Because it is not hermetically sealed.

2. CSTCC_G (3.50MHz-10.0MHz)

Conformal coating of the component is acceptable. However, the resin material, curing temperature, and other process conditions should be evaluated to confirm stable electrical characteristics are maintained.

■ Notice (Storage and Operating Conditions)

CSTCC_G_A/CSTCR_G_A/CSTCE_G_A

Please do not apply excess mechanical stress to the component and terminals at soldering.

Conformal coating of the component is acceptable.

However, the resin material, curing temperature, and other process conditions should be evaluated to confirm stable electrical characteristics are maintained.

The component is recommended with placement machines

with employ optical placement capabilities.

The component might be resulted in damage by excessivemechanical force. Please make sure that you have evaluated by using placementmachines before going into mass production. Do not use placement machines whichutilize mechanical positioning. Please contact Murata for details beforehand.

■ Notice (Storage and Operating Conditions)

CSTCV_X_Q/CSACV_X_Q

Please do not apply excess mechanical stress to the component and terminals at soldering.

Conformal coating of the component is acceptable.

However, the resin material, curing temperature, and other process conditions should be evaluated to confirm stable electrical characteristics are maintained.

The component is recommended with placement machines

which employ optical placement capabilities. In some cases, placement machines which utilize mechanical positioning may apply excessive mechanical force which might result in damage to the ceramic resonator. Please contact Murata before mounting this product using placement machines which use mechanical positioning.

■ Notice (Storage and Operating Conditions)

CSTCW_X/CSACW_X

Please do not apply excess mechanical stress to the component and terminals at soldering.

Conformal coating or washing to the component is not acceptable. Because it is not hermetically sealed.

MHz Chip Type Notice

■ Notice (Storage and Operating Conditions)

CSTCR_G/CSTCE_G/CSTCE_V/CSTCG_V

Please do not apply excess mechanical stress to the component and terminals at soldering.

Conformal coating or washing to the component is not acceptable. Because it is not hermetically sealed.

The component is recommended with placement machines with employ optical placement capabilities.

The component might be resulted in damage by excess mechanical force. Please make sure that you have evaluated by using placement machines before going into mass production. Do not use placement machines which utilize mechanical positioning. Please contact Murata for details beforehand.

■ Notice (Rating)

The component may be damaged if excess mechanical stress is applied.

■ Notice (Handling)

"CERALOCK" may stop oscillating or oscillate irregularly under improper circuit conditions.

Ceramic Resonators (CERALOCK®)

Lead Type Three-Terminals CSTLS Series

"CERALOCK" with built-in load capacitors. MURATA's ceramic resonator, "CERALOCK", has been widely applied as the most suitable component for clock oscillators in a broad range of microprocessors. The CSTLS series can be used in the design of oscillation circuits not requiring external load capacitors, enabling both high-density mounting and cost reduction.

■ Features

1. Oscillation circuits do not require external load capacitors.
2. The series is stable over a wide temperature range.
3. The resonators are compact, light weight and exhibit superior shock resistance performance.
4. They enable the design of oscillator circuits requiring no adjustment.
5. The series is inexpensive and available in stable supply.
6. There are some variation of built-in capacitance value to apply various of IC.

■ Applications

- DTMF generators.
- Clock oscillators for microcomputers.
- Remote control units.
- Automated office equipment.

Part Number	Oscillating Frequency (MHz)	Initial Tolerance (%)	Temp.Stability (%)	Temperature Range (°C)	Aging (10 years) (%)	Use
CSTLS_G	3.40 to 10.00	±0.5	±0.2	-20 to 80	±0.2	For consumer electronics
CSTLS_X	16.00 to 70.00	±0.5	±0.2	-20 to 80	±0.2	For consumer electronics

Irregular or stop oscillation may occur under unmatched circuit conditions. Please check the actual conditions prior to use.
The order quantity should be an integral multiple of the "Minimum Quantity" shown in the packaging page.

Ceramic Resonators (CERALOCK®)

Lead Type Two-Terminals CSALS Series

"CERALOCK" with two leaded terminals.

The CSALS series ceramic resonator owe their development to MURATA's innovative expert technologies and the application of mass production techniques typically utilized in the manufacture of piezoelectric ceramic components. Because of their high mechanical Q and consistent high quality, CSALS series are ideally suited to microprocessor and remote control unit applications.

In addition, MURATA offers a special "CERALOCK" version suitable for automatic insertion utilizing tape and reel and other packaging forms. For further information, please contact your local MURATA representative office or authorized distributor.

4

■ Features

1. The series is stable over a wide temperature range and with respect to long-term aging.
2. The series comprises fixed, tuned, solid-state devices.
3. The resonators are miniature and light weight.
4. They exhibit excellent shock resistance performance.
5. Oscillating circuits requiring no adjustment can be designed by utilizing these resonators in conjunction with transistors or appropriate ICs.

■ Applications

- Square-wave and sine-wave oscillator.
- Clock generator for microprocessors.
- Remote control systems.

Part Number	Oscillating Frequency (MHz)	Initial Tolerance (%)	Temp.Stability (%)	Temperature Range (°C)	Aging (10 years) (%)	Use
CSALS_X	16.00 to 70.00	±0.5	±0.2	-20 to 80	±0.2	For consumer electronics

Irregular or stop oscillation may occur under unmatched circuit conditions. Please check the actual conditions prior to use.
The order quantity should be an integral multiple of the "Minimum Quantity" shown in the packaging page.

Ceramic Resonators (CERALOCK[®])

Chip Type Two-Terminals CSBFB Series

Can be reflow soldered and mounted by automatic placers. MURATA's original package technologies have enabled the development of the kHz band "CERALOCK". The series is perfect in miniature remote control units and AV modules.

■ Features

1. The series withstands reflow soldering.
2. The series is mountable by automatic placers.
3. No adjustment is necessary for oscillation circuits.

■ Applications

- Clock oscillators for microprocessors.
- OA equipment.
- AV modules.

CSBFB_J (700-1250kHz)

(in mm)

kHz Chip Type CSFB_J 430-519kHz Notice (Soldering and Mounting)

1. Soldering Condition

(1) Reflow

Right profile of heat stress is applied to resonator, then being place in natural condition for 1 hour, resonator shall be measured.

1. Pre-heating conditions shall be +140 to +160°C for 60 to 120 seconds. Ascending time up to +150°C shall be longer than 30 second.
2. Heating conditions shall be within 20 seconds at +225°C min., but peak temperature shall be lower than +235°C.

(2) Soldering Iron

Soldering iron of +270±5°C shall be placed 0.5mm above from electrode of resonator. Melting solder through soldering iron shall be applied to electrode for 3±1 seconds, then being place in natural condition for 24 hour, resonator shall be measured.

2. Wash

(1) Cleaning Solvent

HCFC, Isopropanol, Tap water, Demineralized water, Cleanthrough750H, Pine alpha 100S, Techno care FRW

(2) Temperature Difference : dT *1

$dT \leq 60^\circ\text{C}$ (dT=Component-solvent)

*1 ex. In case the component at +90°C immerses into cleaning solvent at +60°C, then dT=30°C.

(3) Condition

1. Ultrasonic Wash

1 minute max. in above solvent at +60°C max.
(Frequency : 28kHz, Output : 20W/L)

2. Immersion Wash

5 minutes max. in above solvent at +60°C max.

3. Shower or Rinse Wash

5 minutes max. in above solvent at +60°C max.

(4) Drying

5 minutes max. by air blow at +80°C max.

(5) Others

1. Total washing time should be within 10 minutes.
2. Please insure the component is thoroughly evaluated in your application circuit.
3. The component may be damaged if it is washed with chlorine, petroleum, or alkali cleaning solvent.

(1) Reflow

Right profile of heat stress is applied to resonator, then being place in natural condition for 1 hour, resonator shall be measured.

1. Pre-heating conditions shall be +140 to +160°C for 60 to 120 seconds. Ascending time up to +150°C shall be longer than 30 second.
2. Heating conditions shall be within 20 seconds at +215°C min., but peak temperature shall be lower than +225°C.

(2) Soldering Iron

Soldering iron of +270±5°C shall be placed 0.5mm above from electrode of resonator. Melting solder through soldering iron shall be applied to electrode for 3±1 seconds, then being place in natural condition for 24 hour, resonator shall be measured.

2. Wash

(1) Cleaning Solvent

HCFC, Isopropanol, Tap water, Demineralized water, Cleanthrough750H, Pine alpha 100S, Techno care FRW

(2) Temperature Difference : dT *1

$dT \leq 60^\circ\text{C}$ ($dT = \text{Component} - \text{solvent}$)

*1 ex. In case the component at +90°C immerses into cleaning solvent at +60°C, then $dT = 30^\circ\text{C}$.

(3) Condition

1. Ultrasonic Wash

1 minute max. in above solvent at +60°C max.
(Frequency : 28kHz, Output : 20W/L)

2. Immersion Wash

5 minutes max. in above solvent at +60°C max.

3. Shower or Rinse Wash

5 minutes max. in above solvent at +60°C max.

(4) Drying

5 minutes max. by air blow at +80°C max.

(5) Others

1. Total washing time should be within 10 minutes.
2. Please insure the component is thoroughly evaluated in your application circuit.
3. The component may be damaged if it is washed with chlorine, petroleum, or alkali cleaning solvent.

Ceramic Resonators (CERALOCK[®])

Lead Type Two-Terminals CSBLA Series

"CERALOCK" with two leaded terminals.

The CSBLA series ceramic resonator owe their development to MURATA's innovative expert technologies and the application of mass production techniques typically utilized in the manufacture of piezoelectric ceramic components. Because of their high mechanical Q and consistent high quality, the CSBLA series are ideally suited to microprocessor and remote control unit applications.

■ Features

1. The series is stable over a wide temperature range and with respect to long-term aging.
2. The series comprises fixed, tuned, solid-state devices.
3. The resonators are miniature and light weight.
4. They exhibit excellent shock resistance performance.
5. Oscillating circuits requiring no adjustment can be designed by utilizing these resonators in conjunction with transistors or appropriate ICs.

■ Applications

- Square-wave and sine-wave oscillator.
- Clock generator for microprocessors.
- Remote control systems.

CSBLA_E
375-429kHz

CSBLA_E
430-509kHz

CSBLA_E
510-699kHz

CSBLA_J
700-1250kHz

Part Number	Oscillating Frequency (kHz)	Initial Tolerance	Temp.Stability (%)	Temperature Range (°C)	Aging (10 years) (%)	Use
CSBLA_E	375 to 699	±2kHz	±0.3	-20 to 80	±0.3	-
CSBLA_J	700 to 1250	±0.5%	±0.3	-20 to 80	±0.3	-

Irregular or stop oscillation may occur under unmatched circuit conditions. Please check the actual conditions prior to use.
The order quantity should be an integral multiple of the "Minimum Quantity" shown in the packaging page.

■ Oscillation Frequency Measuring Circuit

■ Oscillation Frequency Temperature Stability

kHz Lead Type Notice

■ Notice (Soldering and Mounting)

CSBLA_E

The component cannot be withstand washing.

■ Notice (Soldering and Mounting)

CSBLA_J

(1) Cleaning Solvent

HCFC, Isopropanol, Tap water, Demineralized water,
Cleanthrough750H, Pine alpha 100S, Techno care
FRW.

(2) Temperature Difference:dT *1

$dT \leq 30$ C. (dT=Component-solvent)

*1 ex. In case the component at +90 C. immerses
into cleaning solvent at +60 C., then
 $dT=30$ C.

(3) Condition

1. Ultrasonic Wash

1 minute max. in above solvent at +60 C. max.

(Frequency:28kHz, Output:20W/L)

2. Immersion Wash

5 minutes max. in above solvent at +60 C. max.

3. Shower or Rinse Wash

5 minutes max. in above solvent at +60 C. max.

(4) Drying

5 minutes max. by air blow at +80 C. max.

(5) Others

1. Total washing time should be within 10 minutes.

2. Please insure the component is thoroughly
evaluated in your application circuit.

3. The component may be damaged if it is washed
with alkali cleaning solvent.

kHz Type Notice

■ Notice (Storage and Operating Condition)

CSBFB_J

Please do not apply excess mechanical stress to the component and lead terminals at soldering.
Conformal coating of the component is acceptable.
However, the resin material, curing temperature, and other process conditions should be evaluated to confirm stable electrical characteristics are maintained.
Ultrasonic cleaning of the component is acceptable.

However, the size of bath, size and thickness of PBC should be evaluated to confirm stable electrical characteristics are maintained.
In case of the bulk component, dry heating treatment (130 C. for 5 hours min.) is required before reflow soldering. Then, the component should be soldering within 48 hours after dry heating treatment.

■ Notice (Storage and Operating Condition)

CSBLA_E

Please do not apply excess mechanical stress to the component and lead terminals at soldering.
Conformal coating or washing to the component is not acceptable. Because it is not hermetically sealed.

■ Notice (Storage and Operating Condition)

CSBLA_J

Please do not apply excess mechanical stress to the component and lead terminals at soldering.
Conformal coating of the component is acceptable.
However, the resin material, curing temperature, and other process conditions should be evaluated to confirm stable electrical characteristics are maintained.
Ultrasonic cleaning of the component is acceptable.
However, the size of bath, size and thickness of PBC should be evaluated to confirm stable electrical characteristics are maintained.

■ Notice (Rating)

The component may be damaged if excess mechanical stress is applied.

■ Notice (Handling)

"CERALOCK" may stop oscillating or oscillate irregularly under improper circuit conditions.

kHz Type Packaging

CSBFB Series Minimum Quantity

Part Number	Plastic Tape ø330mm	Bulk
CSBFB_J (430 to 519kHz)	1,500	500
CSBFB_J (700 to 1250kHz)	3,000	1,000

The order quantity should be an integral multiple of the "Minimum Quantity" shown above.

(pcs.)

Dimensions of Reel

Dimensions of Taping

CSBLA Series Minimum Quantity

Part Number	Magazine	Bulk
CSBLA_E	50	500
CSBLA_J	100	1,000

The order quantity should be an integral multiple of the "Minimum Quantity" shown above.

(pcs.)

⚠Note:

1. Export Control

〈For customers outside Japan〉

Murata products should not be used or sold for use in the development, production, stockpiling or utilization of any conventional weapons or mass-destructive weapons (nuclear weapons, chemical or biological weapons, or missiles), or any other weapons.

〈For customers in Japan〉

For products which are controlled items subject to the "Foreign Exchange and Foreign Trade Law" of Japan, the export license specified by the law is required for export.

2. Please contact our sales representatives or product engineers before using our products listed in this catalog for the applications listed below which require especially high reliability for the prevention of defects which might directly cause damage to the third party's life, body or property, or when intending to use one of our products for other applications than specified in this catalog.

- | | |
|-----------------------------|---|
| ① Aircraft equipment | ② Aerospace equipment |
| ③ Undersea equipment | ④ Power plant equipment |
| ⑤ Medical equipment | ⑥ Transportation equipment (vehicles, trains, ships, etc.) |
| ⑦ Traffic signal equipment | ⑧ Disaster prevention / crime prevention equipment |
| ⑨ Data-processing equipment | ⑩ Application of similar complexity and/or reliability requirements to the applications listed in the above |

3. Product specifications in this catalog are as of May 2002. They are subject to change or our products in it may be discontinued without advance notice. Please check with our sales representatives or product engineers before ordering. If there are any questions, please contact our sales representatives or product engineers.

4. Please read rating and ⚠CAUTION (for storage and operating, rating, soldering and mounting, handling) in this catalog to prevent smoking and/or burning, etc.

5. This catalog has only typical specifications because there is no space for detailed specifications. Therefore, please approve our product specification or transact the approval sheet for product specification before ordering.

6. Please read CAUTION and Notice in this catalog for safety. This catalog has only typical specifications. Therefore you are requested to approve our product specification or to transact the approval sheet for product specification, before ordering.

7. Please note that unless otherwise specified, we shall assume no responsibility whatsoever for any conflict or dispute that may occur in connection with the effect of our and/or third party's intellectual property rights and other related rights in consideration of your using our products and/or information described or contained in our catalogs. In this connection, no representation shall be made to the effect that any third parties are authorized to use the rights mentioned above under licenses without our consent.

8. No ozone depleting substances (ODS) under the Montreal Protocol are used in our manufacturing process.
