

EMC Components

ACF Series ACF321825, 451832 Types

3-Terminal Filters for Signal Line and DC Power Line SMD

FEATURES

- The ACF series are T-type EMC filters incorporating ferrite chip beads and multilayer ceramic chip capacitors.
- The external structure consists entirely of ferrite, enabling these parts to achieve superior attenuation characteristics despite their extremely compact dimensions.
- Because they can be mounted on edge, the ACF series are ideal for high-density circuit configurations.
- Available for reflow soldering.
