### General Description

The Supertex CL220 is a high voltage, temperature-compensated, 20mA constant current regulator. The device operates at up to 220V, and is accurate to  $\pm 10\%$  over a 5.0 - 160V range. The device can be used as a two terminal constant current source or constant current sink.

A typical application for the CL220 is to drive LEDs with a constant current of 20mA. Multiple CL220s can also be used in parallel to provide higher currents such as 40mA, 60mA, 80mA, and so on. The device is available in the TO-252 (D-PAK) and TO-220 packages.

## Absolute Maximum Ratings

Parameter	Value
Operating voltage, $V_{A-B}$	240V
Operating junction temperature, $T_J$	-40°C to +125°C
Storage temperature, $T_S$	-55°C to +150°C

Absolute Maximum Ratings are those values beyond which damage to the device may occur. Functional operation under these conditions is not implied. Continuous operation of the device at the absolute rating level may affect device reliability. All voltages are referenced to device ground.
