

BEAGLEBONE LCD CAPE

FEATURES:

-  7" TFT LCD Panel
-  800x480 resolution
-  4-wire resistive touchscreen
-  Four user buttons
-  Reset and powered on by buttons
-  More capes can be stacked on the backside

The BeagleBone LCD Cape is a top-level cape with touchscreen capability for use with BeagleBone boards. The topside of this cape features a 7" TFT LCD panel, which can display up to 800x480 resolution, as well as 4-wire resistive touchscreen and four user buttons. The BeagleBone LCD Cape is reset and powered on by buttons. BeagleBone board and other capes are mounted on the backside. When purchasing a BeagleBone LCD Cape, customers have an option of choosing default standoffs or buying an additional set of piano-black aluminum stands.
