Description

The EVAL6474PD demonstration board is a microstepping motor driver. In combination with the STEVAL-PCC009V2 communication board and easySPIN evaluation software, the board allows the user to investigate all the features of the L6474 device.

The 4-layer layout and the PowerSO™ package allow the highest thermal performance to be obtained.

The EVAL6474PD supports the daisy chain configuration making it suitable for the evaluation of the L6474 in multi-motor applications.
