Description

Fixed Voltage Q2L Series are uni-directional SIDACtor® devices designed to protect SLICs (Subscriber Line Interface Circuit) from damaging overvoltage transients.

The series provides single line protection using a fixed voltage switching device for negative surges. All positive surges are routed through an internal diode to a ground reference. The small size of the Q2L makes it ideal for high density applications.

Features and Benefits

- Integrated diode for positive voltage surges
- Low on-state voltage
- Low profile
- Does not degrade with use
- Small footprint QFN Package
- Fails short circuit when surged in excess of ratings

Applicable Global Standards

- GR-1089 Intra-building
- GR 1089 Inter-building
- ITU K.20/21/Basic
- ITU K.20/21/Enhanced
- TIA-968-A
- IEC 61000-4-5
- YD/T 950
