LPC1788 Developer's Kit

Price Information

32-bit databus

Art.no: **EA-OEM-509** Buy

Currently out-of-stock

Expected delivery date:
2011-08-10

Embedded Artists' **LPC1788 Developer's Kit** lets you get up-and-running quickly with the LPC1788 OEM Board. The LPC1788 OEM Board is equipped with NXP's **Cortex-M3** based LPC1788 microcontroller suitable for a wide range of applications that requires advanced communication and high quality graphic displays.

Display Options

Note that display options are sold separately

- 3.2 inch LCD display using the QVGA Display Adapter Kit or the QVGA Display Adapter if you already have the display.

LPC1788 OEM Board

<i>Processor</i>	NXP's Cortex-M3 LPC1788 microcontroller in BGA package
<i>Program Flash</i>	128 MB NAND FLASH + 512 kB internal
<i>Data Memory</i>	32 MB SDRAM + 96 kB internal 32- or 16-bit data bus to SDRAM <i>Note: The Developer's Kit initially only offer the 32-bit databus version.</i>
<i>Ethernet</i>	100/10M Ethernet interface based on SMSC LAN8720 Ethernet PHY
<i>Clock Crystals</i>	<ul style="list-style-type: none"> • 12.000 MHz crystal for CPU • 32.768 kHz crystal for RTC
<i>Dimensions</i>	66 x 48 mm
<i>Power</i>	<ul style="list-style-type: none"> • +3.3V powering
<i>Connectors</i>	<ul style="list-style-type: none"> • 200 pos expansion connector (as defined in SODIMM standard), 0.6mm pitch
<i>Other</i>	<ul style="list-style-type: none"> • 256 Kbit I2C E2PROM for storing non-volatile parameters • Buffered 32- or 16-bit databus

OEM Base Board

<i>Connectors and Interfaces</i>	<ul style="list-style-type: none"> • 200 pos, 0.6mm pitch SODIMM connector for OEM Board • LCD expansion connector with control signals for touch screen interface • Expansion connector with all OEM Board signals
----------------------------------	--

	<ul style="list-style-type: none">• Ethernet connector (RJ45)• CAN interface & connector (provision for second CAN interface, but not mounted)• MMC/SD interface & connector• USB1: OTG or Host interface & connector• USB2: Device or Host interface & connector• Provision for NXP JN5148 RF module (former Jennic) interface (RF module not included)• Full modem RS232 (cannot be fully used on 32-bit databus OEM boards)• RS422/485 interface & connector• Provision for IrDA transceiver interface (transceiver not mounted)• I2S audio codec (mic in, line in, line out, headphone out) • SWD/JTAG connector• Trace connector and pads for ETM connector
<i>Power</i>	<ul style="list-style-type: none">• Power supply, either via USB or external 5V DC• Optional coin cell battery for RTC and LED on ALARM output (coin cell not included)
<i>Other</i>	<ul style="list-style-type: none">• OEM Board current measuring• Parallel NOR flash on external memory bus• 16-bit register and LEDs on external memory bus• 5-key joystick• 3-axis accelerometer (I2C connected)• LM75 temperature sensor (I2C connected)• 5 push-button keys (four via I2C and one on ISP-ENABLE)• 9 LEDs (8 via I2C and one on ISP-ENABLE)• Trimming potentiometer to analog input• USB-to-serial bridge on UART #0 (FT232R) and ISP functionality• Reset push-button and LED• Speaker output on analog output from OEM Board, or from I2S audio codec• 160x150 mm in size
