

## Description

## Features

- RoHS lead-solder-exemption compliant
- New 3.3 V and 5 V output models
- Universal input 85-264 VAC
- Industry-standard footprint: $7.00^{\prime \prime} \times 4.30$ " $\times 1.97^{\prime \prime}$ ( $177.8 \times 109.2 \times 50.0 \mathrm{~mm}$ )
- Input transient \& ESD compliance to EN61000-4-2/-3/-4
- Greater than 134,000 hours MTBF
- Remote sense and overvoltage protection on single output units and main output of multiple output units
- Options include overtemperature protection, Power Fail signal, chassis, \& cover

Power-One's MAP110 Series of power supplies combines low cost and universal input in a board-only power solution to meet commercial and industrial requirements. Full international safety, EMI, and ESD compliance ensure worldwide acceptance. All units bear the CE Mark.

Wide dynamic output current and fixed-frequency operation simplifies system level operation. The MAP110 series is configured to an international standard footprint. Input and output connections are made via popular single-row Molex connectors.
Single output models feature wide-range output adjustability to meet a wide variety of standard and user-specific output voltage requirements
