# **HDSP-Fxxx, HDSP-Gxxx Series** 10 mm (0.40 inch) Seven Segment Displays

# **Data Sheet**

HDSP-F15x/F16x Series HDSP-F20x/F30x/F40x/F50x Series HDSP-G20x/G50x Series

# Description

The 10 mm (0.40 inch) LED seven segment displays are Avago's most space-efficient character size. They are designed for viewing distances up to 4.5 metres (15 feet). These devices use an industry standard size package and pinout. The dual numeric, single numeric, and  $\pm 1$ . overflow devices feature a right hand decimal point. All devices are available as either common anode or common cathode.

Typical applications include instruments, point of sale terminals, and appliances.

# Features (Cont.)

- Categorized for luminous intensity Yellow and Green categorized for color Use of like categories yields a uniform display
- High light output
- High peak current
- Excellent for long digit string multiplexing
- Intensity and color selection option
- Sunlight viewable AlGaAs

# B. B. C.

## Features

- Industry standard size
- Industry standard pinout
  - 7.6 mm (0.3 inch) DIP single
  - 15.24 mm (0.6 inch) DIP dual

Leads on 2.54 mm (0.1 inch) centers

- Choice of colors AlGaAs Red, High Efficiency Red, Orange, Yellow, Green
- Excellent appearance

   Evenly lighted segments
   Mitered corners on segments
   Gray package gives optimum contrast
   Black surface and color tinted epoxy
   (HDSP-F161 only)
   ±50° viewing angle
- Design flexibility| Common anode or common cathode Single and dual digits Right hand decimal point ±1. overflow character

Note:

1. These displays are recommended for high ambient light operation. Please refer to the HDSP-F10X data sheet for low current operation.

## **Part Numbering System**

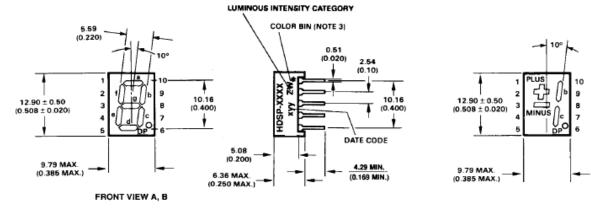

Notes:

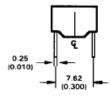

1. For codes not listed in the figure above, please refer to the respective data sheet or contact your nearest Avago representative for details.

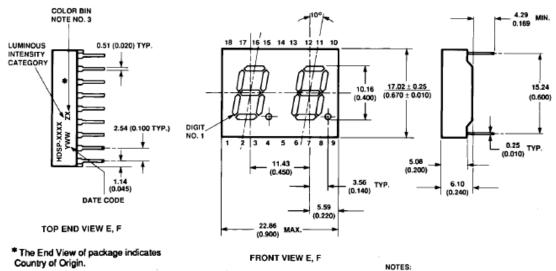

2. Bin options refer to shippable bins for a part-number. Color and Intensity Bins are typically restricted to 1 bin per tube (exceptions may apply). Please refer to respective data sheet for specific bin limit information.

# **Package Dimensions**

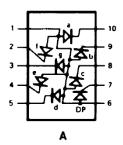

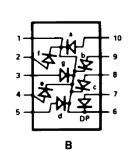

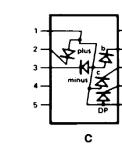

1. DIMENSIONS ARE IN MILLIMETRES (INCHES). 2. ALL UNTOLERANCED DIIMENSIONS ARE FOR REFERENCE ONLY. 3. WHERE APPLICABLE.

Notes:

1. See Figure 1 to establish pulsed conditions.

2. Derate above 46°C at 0.54 mA/°C.

3. See Figure 6 to establish pulsed conditions.

4. Derate above 53°C at 0.45 mA/°C.

5. See Figure 7 to establish pulsed conditions.

6. Derate above 81°C at 0.52 mA/°C.

7. See Figure 8 to establish pulsed conditions.

8. Derate above 39°C at 0.37 mA/°C.

 For operation below -20°C, contact your local Avago components sales office or an authorized distributor.

Notes:

1. Case temperature of device immediately prior to the intensity measurement is 25°C.

2. The digits are categorized for luminous intensity. The intensity category is designated by a letter on the side of the package.

3. The dominant wavelength,  $\lambda_{d'}$  is derived from the CIE chromaticity diagram and is that single wavelength which defines the color of the device. 4. Typical specification for reference only. Do not exceed absolute maximum ratings.

5. For low current operation, the AlGaAs HDSP-F10X, G10X series displays are recommended. They are tested at 1 mA

dc/segment and are pin for pin compatible with the HDSP-F15X/F16x/G15X series.

6. The Yellow (HDSP-F30X/G30X) series and Green (HDSP-F50X/G50X) series displays are categorized for dominant wavelength. The category is designated by a number adjacent to the luminous intensity category letter.

Note:

All categories are established for classification of products. Products may not be available in all categories. Please contact your local Avago representatives for further clarification/information.

#### **Contrast Enhancement**

For information on contrast enhancement, please see Application Note 1015.

## Soldering/Cleaning

Cleaning agents from the ketone family (acetone, methyl ethyl ketone, etc.) and from the chlorinated hydrocarbon family (methylene chloride, trichloro- ethylene, carbon tetrachloride, etc.) are not recommended for cleaning LED parts. All of these various solvents attack or dissolve the encapsulating epoxies used to form the package of plastic LED parts.

For further information on soldering LEDs, please refer to Application Note 1027.
