Safety Lever Lock HW9Z-LS

Every HW series control unit, except for pilot lights and unibody type emergency stop switches, is supplied with the HW9Z-LS safety lever lock. IDEC strongly recommends using the safety lever lock to prevent heavy vibration or maintenance personnel from unlocking contacts.

Downloaded from Elcodis.com electronic components distributor

Complete with IP20 finger-safe contact blocks
Ensure safety and save wiring time

- The locking lever removable contact block features spring-up screw terminals.
- Self-cleaning rolling action contacts have a raked contact surface.
- Degree of protection: IP65
- A wide range of operating voltages for worldwide application
- UL, CSA approved, and EN compliant

Safety Standards	File No. or Organization
UL	UL Listing File No. E68961

EN EN60947-1 EN60947-5-1	TÜV Rheinland R9551089

Specifications and Ratings

Contact Ratings

Pushbuttons Illuminated Pushbuttons Selector Switches Illuminated Selector Switches Pushbutton Selectors	Contact Block	Type HW-G (HW series)
	Rated Insulation Voltage	600V
	Rated Continuous Current	10A
	Contact Ratings by Utilization Category IEC 60947-5-1	AC-15 (A600) DC-13 (P600)

Characteristics

• Contact Ratings by Utilization Category

Operational Voltage			24V	48V	50V	110V	220V	440V
Operational Current	AC 50/60 Hz	AC-12 Control of resistive loads and solid state loads	10A	—	10A	10A	6A	2A
		AC-15 Control of electromagnetic loads (> 72 VA)	10A	—	7A	5A	3A	1A
	DC	DC-12 Control of resistive loads and solid state loads	8A	4A	—	2.2A	1.1A	—
		DC-13 Control of electromagnets	4A	2A	—	1.1A	0.6A	—

Note: The operational current represents the classification by making and breaking currents (IEC 60947-5-1).
Minimum applicable load: 3V AC/DC, 5 mA (applicable range may vary with operating conditions and load types)

For the control units listed below, the rated current (load switching current) is reduced to a half of the rated operational current of the contact block. The rated insulation voltage (600V) and the rated thermal current (10A) remain unchanged.
- 3-position selector switches which contain J or S following 3 in the Type No. and which have cam code J or S. Example: HW1S-3JT21N1
- All 4-position and 5-position selector switches
- All mono-lever switches
- All pushbutton selectors

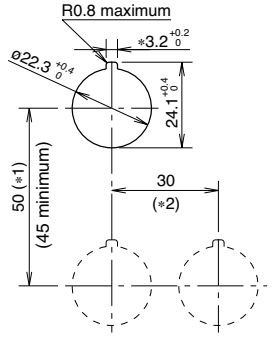
Specifications

Operating Temperature	–25 to +60°C (no freezing) Illuminated units: –25 to +50°C
Storage Temperature	–40 to +80°C
Operating Humidity	45 to 85% RH (no condensation)
Contact Resistance	50 mΩ maximum (initial value)
Insulation Resistance	100 MΩ minimum (500V DC megger)
Dielectric Strength	Between live and dead metal parts: 2,500V AC, 1 minute (Full voltage type illuminated units: 2,000V AC, 1 minute)
Vibration Resistance	Operating extremes: 5 to 55 Hz, amplitude 0.5 mm
Shock Resistance	Damage limits: 1,000 m/s^2 Operating extremes: 100 m/s^2
Mechanical Life (minimum operations)	Pushbuttons, Illuminated pushbuttons Momentary: 5,000,000 Maintained: 500,000 Selector switches: 500,000 Key selector switches: 500,000 Illuminated selector switches: 500,000 Pushbutton selectors: 250,000 Mono-lever switches: 250,000
Electrical Life (minimum operations)	Pushbuttons, Illuminated pushbuttons: 500,000 ∗1 Selector switches: 500,000 ∗2 Key selector switches: 500,000 ∗2 Illuminated selector switches: 500,000 ∗2 Pushbutton selectors: 250,000 ∗2 Mono-lever switches: 250,000 ∗3 ∗1 Switching frequency 1,800 operations/h, duty ratio 40% ∗2 Switching frequency 1,200 operations/h, duty ratio 40% ∗3 Switching frequency 900 operations/h, duty ratio 40%

Degree of Protection

Unit	NEMA ICS 6-110	IEC 60529
All units	Type 1, 2, 3, 3R, (3S), 4, 5, 12,13	IP65

Mounting Hole Layout



∗ The 3.2 mm recess is for preventing rotation and is not necessary when the nameplate or anti-rotation ring is not used.

The minimum mounting centers are applicable to switches with one layer of contact blocks (two contact blocks). When two layers of contact blocks are mounted, determine the minimum mounting centers in consideration of convenience for wiring.

• Minimum Mounting Centers

Unit	∗1	∗2
ø40mm mushroom button	50 mm	40 mm
Pilot light	30 mm	30 mm
Pushbutton selector	50 mm	50 mm
Mono-lever switch	72 mm	72 mm

Note: When using the safety lever lock, determine the vertical spacing (*1) in consideration of convenience for installing and removing the safety lever lock.

Recommended vertical spacing: 100 mm

Ordering Information

The Type No. development charts shown below can be used to specify control units other than those listed on the following pages. Gold-plated silver contacts are also available.

Emergency Stop Switches

For emergency stop purposes, these switches must contain at least one NC contact block.

HW1B-V4 11 R -MAU

- Optional contact
  - MAU: Gold-plated silver contact
- Button/lens color code
- Contact arrangement code

01:	1NC	11:	1NO-1NC
02:	2NC	21:	2NO-1NC
12:	1NO-2NC	03:	3NC
31:	3NO-1NC	22:	2NO-2NC
13:	1NO-3NC	04:	4NC

Note:
Push-pull type HW1B-Y2 can have a maximum of two contact blocks.

Pushbuttons

HW1B-M1 11 R -MAU

- Optional contact
  - MAU: Gold-plated silver contact
- Button color code
- Contact arrangement code

	2NC	HW1B-Y202①	

- The button is maintained at either pulled or depressed position.
- Push-pull switches are available with one or two contact blocks.
- Push-pull switches with one contact block contain a dummy block.
- Safety lever lock HW9Z-LS is supplied with the switch.

Accessory

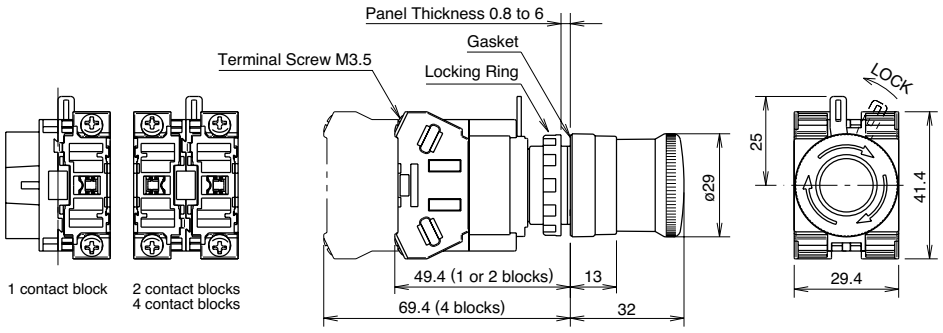
Nameplate

Shape	Name	Type No.	Legend	Package Quantity	Remarks
	Nameplate for Emergency Stop Switch	HWAV-0	(blank)	1	Background: Yellow Legend: Black Applicable panel thickness: 0.8 to 4.5 mm Material: Polyamide Not applicable for ø60mm mushroom buttons. Legend "EMERGENCY STOP" is indicated outside a ø44mm circle.
		HWAV-27	EMERGENCY STOP		

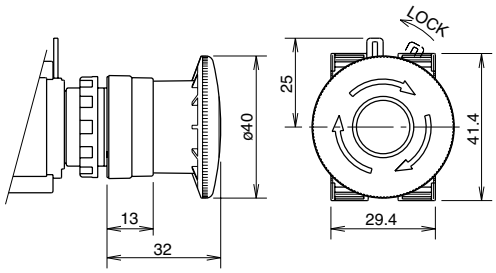
Downloaded from Elcodis.com electronic components distributor

Dimensions

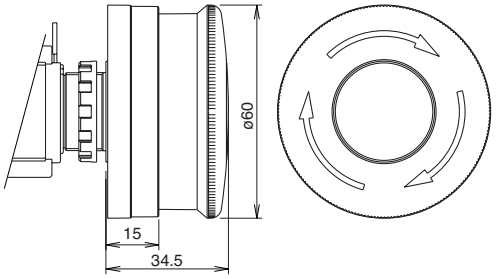
• ø29mm Pushlock Turn Reset
HW1B-V3



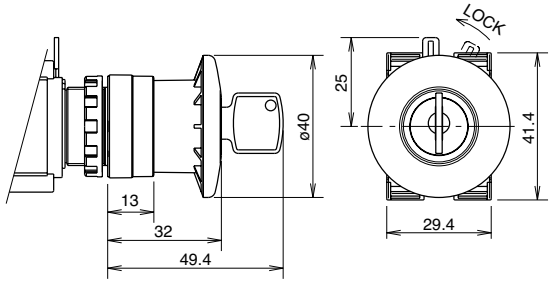
• ø40mm Pushlock Turn Reset
HW1B-V4



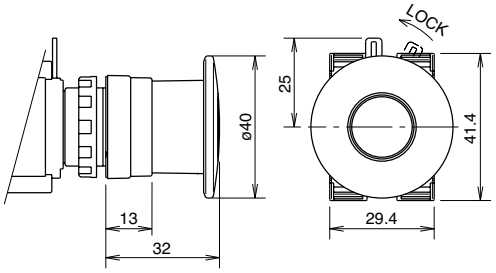
• ø60mm Pushlock Turn Reset
HW1B-V5



• ø40mm Pushlock Key Reset
HW1B-X4

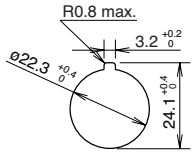


• ø40mm Push-Pull
HW1B-Y2



All dimensions in mm.

Mounting Hole



The minimum mounting centers shown below are applicable to emergency stop switches with one layer of contact blocks (two contact blocks). When two layers of contact blocks are mounted, determine the minimum mounting centers in consideration of convenience for wiring.

• Minimum Mounting Centers for Emergency Stop Switches

Unit	Vertical Spacing	Horizontal Spacing
HW1B-V3 HW1B-V4 HW1B-X4 HW1B-Y2	50 mm	50 mm
HW1B-V5	60 mm	60 mm

Note: When using the safety lever lock, determine the vertical spacing in consideration of convenience for installing and removing the safety lever lock.
Recommended vertical spacing: 100 mm

For emergency stop control boxes, see page 48.

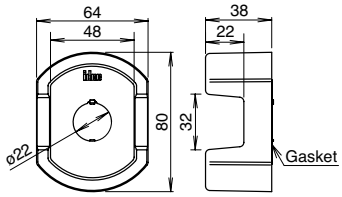
SEMI Standard Compliant Switch Guards (For ø22mm mounting hole)

• SEMI S2-0200 12.5.1 Compliant

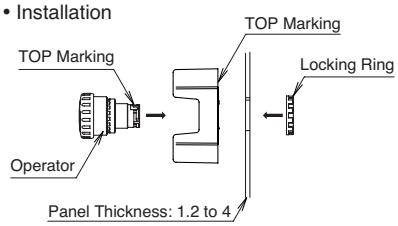
- Type No.: HW9Z-KG1
- Degree of Protection: IP65
- Color: Yellow

Not applicable for ø60mm mushroom buttons.

- Dimensions



- Installation

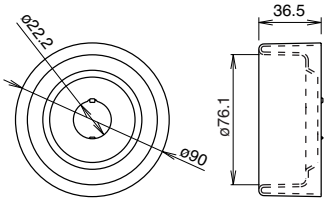


• SEMATECH Application Guide for SEMI S2-93, 12.4 Compliant

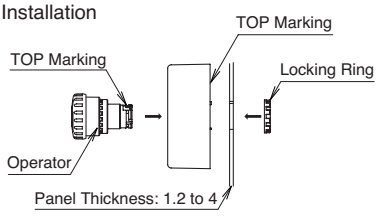
- Type No.: HW9Z-KG2
- Degree of Protection: IP65
- Color: Yellow

Not applicable for ø60mm mushroom buttons.

- Dimensions

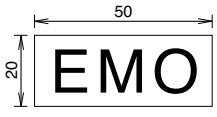


- Installation



• EMO Sticker

- Type No.: HW9Z-EMO-NPP
- Package Quantity: 10
- Color: Yellow with red letter



Caution

International industrial standards such as European Union Directive, IEC60204-1, and JIS B9960-1 require that emergency stop switches must be installed in the manner in which the operator can access and operate the switches easily, and prohibit the use of switch guards. The HW9Z-KG1 and HW9Z-KG2 switch guards are used for the emergency stop switches installed on semiconductor manufacturing equipment only. Do not use the switch guards for emergency stop switches installed on machine systems such as machine tool and food processing systems.

• On the contact arrangement marked with ★ in the table above, the rated current (load switching current) is reduced to a half of the rated current of the contact block. The rated insulation voltage and the rated thermal current remain unchanged.

Remarks: When ordering the contact arrangement indicated with "Standard" in the table above, specify the Type No. shown in the standard Type No. on preceding pages. For other contact arrangements, see page 36 to specify the Type No. and contact code.

- On the contact arrangement marked with ★ in the table above, the rated current (load switching current) is reduced to a half of the rated current of the contact block. The rated insulation voltage and the rated thermal current remain unchanged.
- When operating the pushbutton selector, do not turn the operator ring or the lock lever while the button is depressed. Otherwise the pushbutton selector may be damaged.
- Other contact arrangements are also available upon request.

Safety Precautions

- Turn off the power to the HW series control units before starting installation, removal, wiring, maintenance, and inspection of the products. Failure to turn power off may cause electrical shocks or fire hazard.
- To avoid a burn on your hand, use the lamp holder tool when replacing lamps.
- For wiring, use wires of a proper size to meet the voltage and current requirements. Tighten the M3.5 terminal screws to a tightening torque of 1.0 to 1.3 N·m. Failure to tighten terminal screws may cause overheat and fire.

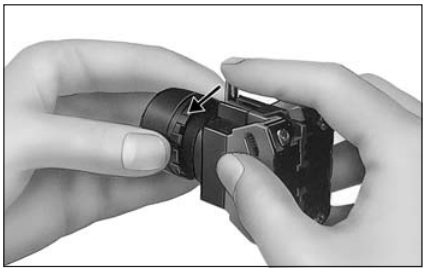
Instructions

Panel Mounting

Remove the contact block from the operator (for transformer type pilot lights, remove the transformer from the illumination unit). Remove the locking ring from the operator. Insert the operator into the panel cut-out from the front, tighten the locking ring from the back, then install the contact block to the operator.

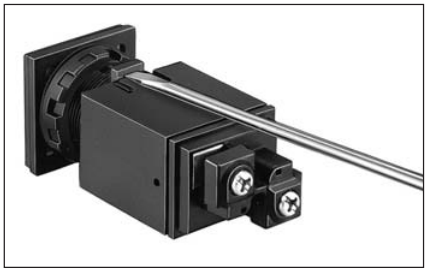
• Removing and Installing the Contact Block

1. To remove the operator from the contact block, turn the locking lever in the direction of the arrow shown below. Then the operator can be pulled out.
2. To reinstall, place the TOP markings on the operator and the contact block mounting adapter in the same direction, and insert the operator into the contact block mounting adapter. Then turn the locking lever in the opposite direction.



• Removing and Installing the Transformer Unit on Pilot Lights

1. Insert a flat screwdriver (5mm wide at the maximum) into the latch hole on the transformer unit as shown in the photo below, and disengage the latch. Then pull out the illumination unit.
2. To reinstall, place the TOP marking on the illumination unit and the latch in the same direction, and push the illumination unit into the transformer unit.



• Notes for Panel Mounting

1. When mounting the operator onto a panel, use the optional locking ring wrench (MW9Z-T1) to tighten the locking ring. Tightening torque must not exceed 2.0 N·m. Do not use pliers. Excessive tightening will damage the locking ring.
2. For the contact blocks and transformers housing LED and incandescent lamps, make sure not to press the lamps too hard, otherwise the lamp socket may be impaired.

• Notes for Illuminated Pushbuttons

The full shroud cannot be removed from the extended full shroud type.

Safety Lever Lock

IDEC strongly recommends using the safety lever lock (HW9Z-LS, yellow) to prevent heavy vibration or maintenance personnel from unlocking contacts.

1. HW series can be mounted vertically with a minimum spacing of 50 mm (70 mm for mono-lever switches) but spacing should be determined to ensure easy operation.
2. Mount the control unit onto the panel, lock the lever, and strongly push in the safety lever lock to install.
3. When the spacing is narrower than the recommended value, with the lever unlocked, mount the safety lever lock and insert the contact unit to the operator. Then, lock the lever and strongly push in the safety lever lock to install.
4. To remove the safety lever lock, insert a flat screwdriver into the safety lever lock and push upwards.

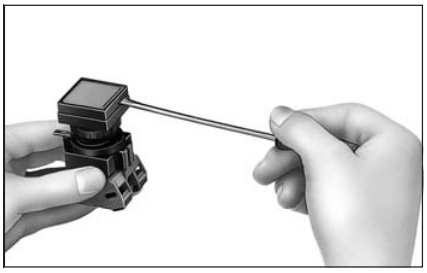
Instructions

Replacement of Lens and Marking Plate

• Removing

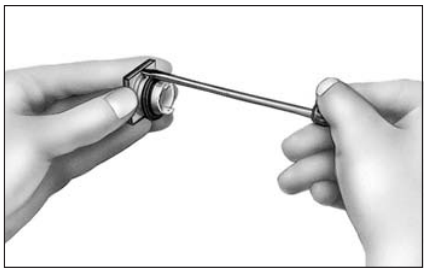
1. Remove the lens unit (color lens, marking plate, and lens holder) by inserting a screwdriver into the recess of the lens thorough the bezel.

[Removing the Lens Unit]



2. Remove the marking plate by pushing the lens from the rear to disengage the latches between the lens and the lens holder, using the screwdriver as shown below.

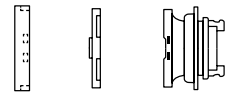
[Removing the Lens]



Note: The translucent filter in the lens holder cannot be removed because this filter is sealed to make the unit waterproof and oiltight.

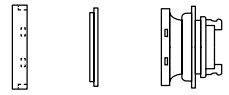
• Installing

[For Round Lens Type]



1. Place the marking plate on the lens holder with the anti-rotation projection engaged and press the lens onto the lens holder to engage the latches.
2. Place the marking plate in the correct orientation.

[For Square Lens Type]



1. Place the marking plate on the lens holder and press the lens onto the lens holder to engage the latches.
2. Place the marking plate in the correct orientation.

Marking

For HW series illuminated pushbuttons and pilot lights, legends and symbols can be engraved on the built-in marking plates, or printed film can be inserted under the lens for labeling purposes. Films are not supplied with illuminated pushbuttons, and may be provided by the user.

• Marking Plates and Marking Film Size

Lens Style	Round Lens Type	Square Lens Type
Built-in Marking Plate			• Engraving must be made on the engraving area within 0.5mm deep. • The marking plate is made of white acrylic resin.	
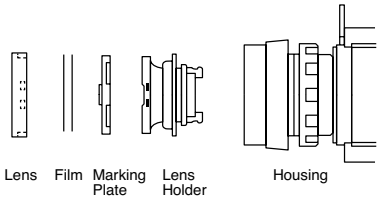
Applicable Marking Film			• Mylar for printing labels is not included and must be provided and printed by the user. • Two 0.1mm-thick films or one 0.2mm-thick film can be installed in the lens. • Recommended marking film: Mylar	

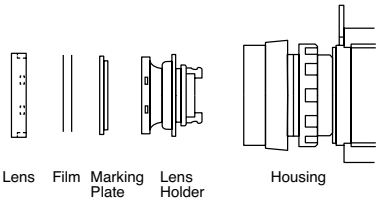
• Insertion Order of Marking Plate and Film

[Round Lens Type]



Note: Films are not included.

[Square Lens Type]



Note: Films are not included.
Place the marking plate in the correct orientation.

Downloaded from Elcodis.com electronic components distributor

Instructions

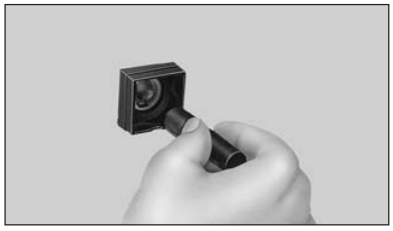
Replacement of Lamps

Lamps can be replaced by using the lamp holder tool (OR-55) from the front of the panel, or by removing the contact block from the operator unit.

• Removing the Lamps from the Front of the Panel

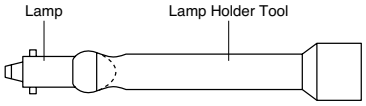
[How to Remove]

1. To remove, slip the lamp holder tool onto the lamp head lightly. Then push slightly, and turn the lamp holder tool counterclockwise.

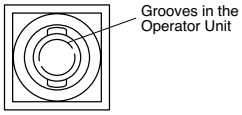


[How to Install]

1. To install, insert the lamp head into the lamp holder tool, and hold the lamp as shown in the figure below.

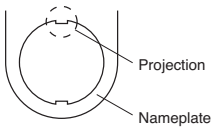


2. Place the pins on the lamp base to the grooves in the lamp socket. Insert the lamp and turn it clockwise.



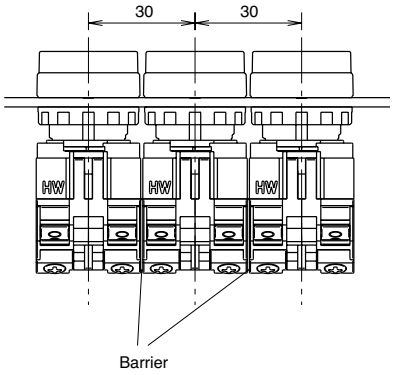
Nameplate

When anti-rotation is not required, remove the projection from the nameplate using pliers.

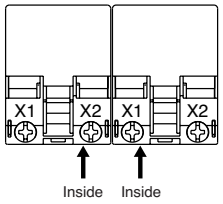


Close Mounting

When mounting the units closely in a horizontal row on 30mm centers, use optional barriers to prevent interconnection between adjoining terminals. The barriers can be attached simply by pressing them onto the sides of contact blocks.



When mounting transformer type illuminated units closely in a horizontal row on 30mm centers, insert solid wires or stranded wires into inside of the terminal screw on the transformer (see figure below) to prevent short circuit between adjoining terminals.



When using transformer type pilot lights closely mounted in horizontal and vertical rows on 30mm centers, keep the ambient temperature below 40°C.

Downloaded from Elcodis.com electronic components distributor

Instructions

Tightening Torque for Terminal Screws

Tighten the M3.5 terminal screws to a torque of 1.0 to 1.3 N·m.

Installation of LED Illuminated Units

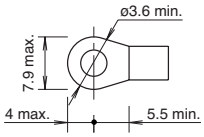
1. When using full voltage type LED illuminated units, provide protection against electrical noise, if necessary.
2. Notes for Pure White LED Lamps

- Do not use the pure white LED outdoors, otherwise it will lead to the degradation of brightness and color. Do not remove or apply shock to the cap on the pure white LED lamp, otherwise it may break or damage the cap.
- Use a white lens. The illumination color will be dull if a different color lens is used.

Applicable Wiring

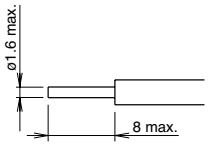
The applicable wire size is 2mm^2 maximum. (Solid wire ø1.6 mm max.) One or two wires can be connected.

• Applicable Crimping Terminal

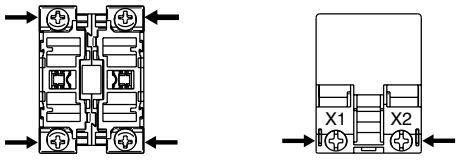


Be sure to use an insulation tube or cover on the crimping part of the crimping terminal to prevent electrical shocks.

• Solid Wire

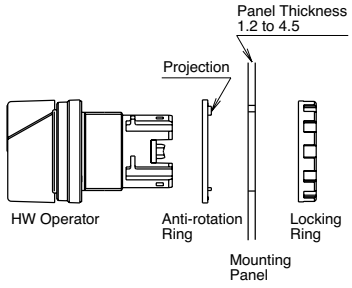


Note: Contact Block and Transformer
When connecting wires in the direction shown below, keep the insulation stripping length 6.6 mm at the maximum.



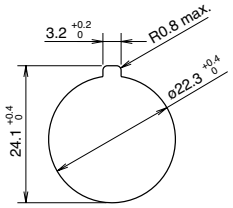
Anti-rotation Ring and Panel Cut-out

Align the TOP marking on the operator and the ▲ mark on the anti-rotation ring with the recess in the mounting panel.



• Panel Cut-out

(Complies with IEC947-5-1)



Unibody Pushlock Turn Reset

• Removing the lens

Remove the lens by inserting a screwdriver into the left or right recess of the lens. Be careful that the lens does not drop off.

• Removing the LED/incandescent lamp

Use a lens removal tool to remove the lamp. See page 46 for more information.

• Notes for Wiring

Ensure that the crimping terminal of each wiring is properly insulated.

Key Selector Switch

• Notes for using a different key

When a different number key is inserted into the key hole, it will not normally operate. However, if the key is forced to turn or is not inserted properly, it may be turned.

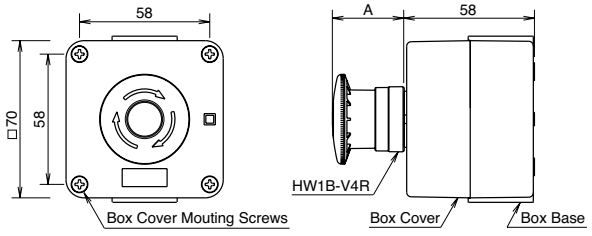
Characteristics

• Contact Ratings by Utilization Category

Operational Voltage				24V	48V	50V	110V	220V	440V
Operational Current	AC 50/60 Hz	AC-12	Control of resistive loads and solid state loads	10A	—	10A	10A	6A	2A
		AC-15	Control of electromagnetic loads (> 72 VA)	10A	—	7A	5A	3A	1A
	DC	DC-12	Control of resistive loads and solid state loads	8A	4A	—	2.2A	1.1A	—
		DC-13	Control of electromagnets	4A	2A	—	1.1A	0.6A	—

Note:
The operational current represents the classification by making and breaking currents (IEC 60947-5-1).
Minimum applicable load: 3V AC/DC, 5 mA (Applicable range may vary with operating conditions and load types.)

Dimensions

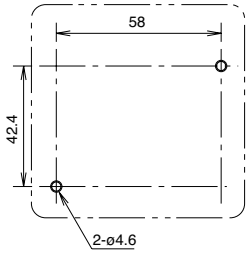


All dimensions in mm.

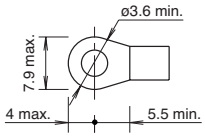
Control Unit (Operator)	Dimension A (mm)
Pushbutton	13.0
Selector Switch	21.0
Pushlock Turn Reset	32.0
Pushlock Key Reset	32.0 (Key inserted: 49.4)

Downloaded from Elcodis.com electronic components distributor

Mounting Hole Layout



Applicable Terminal



Tightening torque: 1.0 to 1.3 N·m
A maximum of two pieces can be connected to one terminal.

Nameplate

Type No.	NSA-0
Color: Black, without legend Thickness: 1.2 mm (Remove the anti-rotation projection)	Material	Aluminum

The nameplate is supplied with the pushbutton and selector switch control boxes. When not using the nameplate, use the cover gasket (HW9Z-W).

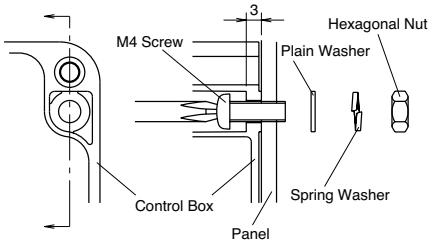
HW series nameplates (HWA∗) cannot be used.

Operating Instructions

• Panel Mounting

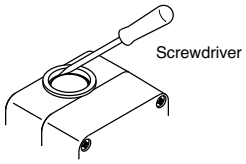
To mount the control box on a panel, use two M4 screws, plane washers and spring washers to preventing loosening. Tighten the screws to a torque of 1.4 to 2.0 N·m.

Determine the screw length in consideration of the panel thickness.



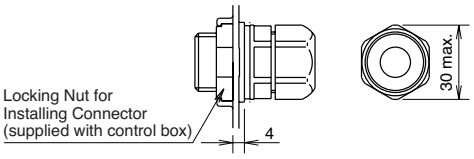
• Applicable Connector and Installation

1. To install a connector, break open the conduit port on the top and bottom of the control box. Before opening the conduit port, remove the attached two connector locking nuts from the control box base. Place the tip of a screwdriver on the conduit port and strike the screwdriver end. Make sure that the conduit port is free from burs and cracks, which may hamper waterproof characteristics.



2. Use G1/2 or PG16 connectors which can mount on a panel of 4.0 mm thick minimum. To install the connector to the control box, use the attached connector locking nut and tighten the locking nut sufficiently. If the locking nut is tightened insufficiently, the waterproof characteristics are not ensured.

Thread Size	Locking Nut Color	Locking Nut Type No.
G1/2	White	HW9Z-G
PG16	Black	HW9Z-PG



3. Only when using a plastic connector, Insulation Class II (IEC 61140) is satisfied.
4. Install the box cover flat on the box base. When the box cover is installed diagonally, the box cover cannot be secured correctly, resulting in an operation error.

• Applicable Cables

Applicable CVV Cable	Outside Diameter	Core Wires
1.25 mm^2	ø14.5 mm maximum	8 maximum
2.0 mm^2	ø14.5 mm maximum	8 maximum

• Applicable Conduits

Metal Conduit Outside Diameter		ø10 mm	ø12 mm
Conduit Inside Diameter		ø8.3 mm minimum	ø10.6 mm minimum
IV Wire Quantity	1.25 mm^2	2 to 3	4 to 6
	2.0 mm^2	2 to 3	3 to 4

Wire containment density: 32% to 48%
Select a cable appropriate for the connector.
