Particle Counter 01.09

Affordable Particle Counter

Delivering test and measurement advantages for HVAC/R professionals worldwide

Test the TPI advantage

1020 APPLICATIONS

- Airborne contamination monitoring & testing
- Clean rooms
- Emissions sourcing
- Filter testing
- IAQ monitoring & testing

1020: Handheld Particle Counter

• Small Size -Big Performance

The handheld TPI 1020 is a portable particle counter that counts particles down to 0.3 microns-giving you portability and reliability at the lowest price in the industry.

• Completely Self-Contained-Selectable Particle Sizes Don't let the size fool you-the TPI 1020 is completely self-contained with its own internal battery and sample pump, and is programmable, allowing you to choose your particle size of interest from five sizes: 0.3, 0.5, 1.0, 2.0, or 5.0 microns.

Fast Sampling

Unlike other counters that can take up to a minute to deliver results, the TPI 1020 starts delivering volumetric concentration results in about 3 seconds! This facilitates quick multi-site sampling, tracing particle sources and site particle trending.

Simple Operation

Only two front-panel buttons control the size channels and sample cycle. Power is controlled by the Start / Stop button.

Battery or AC Powered

The self-contained battery pack powers the unit for 30 hours of typical intermittent operation, and for up to 12 hours of continuous use. The included AC charger / adapter operates the counter, even when the battery pack is discharged, and recharges the depleted battery in 2.5 hours.

Specifications

Particle Size Range >0.3, >0.5, >1.0, >2.0, and >5.0 μm (selectable)

Concentration Range 0 - 3,000,000 particles per cubic foot

(105,900 particles/L)

Accuracy \pm 10%, to calibration aerosol

Sensitivity 0.3 µm

Flow Rate 0.1 cfm (2.83 lpm)

Sample Time 1 minute total (reading updated every 3 seconds)
