GAS DISCHARGE TUBES

Bourns Releases New Gas Discharge Tube Model 2051 Series

Riverside, California - TO BE RELEASED APRIL 12, 2011 - Bourns is pleased to announce the release of the 2051 Series Miniature Gas Discharge Tube (GDT).

The 2051 Series is designed specifically for telecom and industrial communication applications requiring an extremely small (2.7 x 3.2 x 4.5 mm) and robust overvoltage protection solution. The 2051's compact size makes it ideal for PCI cards, MDC Modems, Splitters and CPE applications with space limitations. The series has low capacitance which also makes it a good choice for use in high-speed/high-bandwidth applications.

The new models are available as RoHS* compliant. The product data sheet with detailed specifications can be viewed on the Bourns website at www.bourns.com. Please contact your local Bourns Representative or Bourns Customer Service for samples or for further information.

Features

- Compact size
- Low capacitance
- Performance stability over life
- High insulation resistance
- RoHS compliant*
-  UL Recognized

Applications

- MDC / PCI modems
- Splitters
- Telecom CPE
- Datacom
