#### ⑦ Capacitance

Expressed by three-digit alphanumerics. The unit is pico-farad (pF). The first and second figures are significant digits, and the third figure expresses the number of zeros which follow the two numbers. If there is a decimal point, it is expressed by the capital letter "R". In this case, all figures are significant digits.

⑤ Category

⑥ Inductance

Expressed by three-digit alphanumerics. The unit is micro-henry (μH). The first and second figures are significant digits, and the third figure expresses the number of zeros which follow the two figures. If there is a decimal point, it is expressed by the capital letter "R". In this case, all figures are significant digits. If inductance is less than 0.1μH, the inductance code is expressed by a combination of two figures and the capital letter "N", and the unit of inductance is nano-henry (nH).

The capital letter "N" indicates the unit of "nH", and also expresses a decimal point. In this case, all figures are significant digits.

# Thin Film Circuit Substrate (RUSUB®)

for Photo Diode Module

● Features

- RUSUB® technology provides single-layer capacitor and thin film resistor formed in one chip. It reduces not only numbers of parts to build a device, but also the assembly costs. It will also contribute to make a device smaller.
- The single-layer structure makes its self-resonant frequency higher. It allows the devices to operate stable even at a high frequency range.
- Short distance between the capacitor and thin film resistor makes the residue inductance smaller and it contributes to attenuate unnecessary noise. So the device can work at its best characteristics.
- Since it has gold electrode, it is feasible to be installed inside a module, and it allows wire-bonding with gold wire.
- AuSn pre-coating finish is also available.
- It is very suitable for APD (Avalanche Photo Diode), because the capacitor has withstanding voltage of 100V.

● Main Application

- Low pass filter for power supply of PD (Photo Diode).
- Low pass filter for power supply of TIA (Transimpedance Amp. = Pre Amp.).

● Specification
