The BXA10 series of DC/DC converters, comprising 7 different models, is designed for a wide range of applications including communications, industrial systems and mobile battery powered systems. Packing up to 10 Watts of power into a 2 x 1 x 0.395 inch package, with efficiencies as high as 85%, the BXA10 has wide input ranges of 9-18VDC and 18-75VDC, and is available in single and dual output versions. Isolation of 1500VDC, approval to EN60950 2nd edition, coupled with reduced conducted noise for simplified compliance to FCC Part 15 level A and EN55022 level A, make the BXA10 ideal for telecommunications and distributed power applications. Other features include overvoltage protection, continuous short circuit protection with automatic recovery and remote on/off, all of which minimize the need for external circuitry and make the BXA10 a recommended component in distributed power systems.

## Notes

- At nominal input and output voltage and maximum load.
- Output ripple can be reduced to <50mV with the addition of a 33µF, 25V, AVX-TPS (or equivalent) tantalum capacitor. Consult factory for further information.
- For units with optional remote ON/OFF, please add the suffix '-S' to the model number: e.g. **BXA10-48S05-S**. Maximum open pin voltage 14VDC.
- Assumes balanced loads on dual output models.
- High impedance source/long input power cable may necessitate the introduction of an input filter.
- Typical 9-18VDC model start-up voltage is 9V. Maximum start-up voltage is 9.5V (>0°C) or 9.7V (<0°C).
- It is recommended that an IEC127, 250V, fast blow fuse is used rated at 4A for nominal 12V models and 2A for 48V models.
- To achieve compliance to EN55022-A and FCC part 15 Class A, external capacitors of the following values are needed:

Model	C1*	C2	C3
BXA10-12xxx	10µF film, 25V	0.22µF film	0.22µF film
BXA10-48xxx	10µF film, 100V	0.22µF film	0.22µF film

(C2, C3 voltage rating application dependent)
