

Audio / video switch for CANAL - Plus decoder

BH7634AS

The BH7634AS is one-chip IC that contains audio and video switches that support 21-pin SECAM and PAL connectors.

The I²C BUS for switch control simplifies applications, while the two expansion ports allow up to two external inputs.

●Applications

VCRs

●Features

- 1) I²C BUS control.
- 2) Video input is sync tip clamped, and includes a small-capacity (0.022μF) input capacitor.
- 3) Three FSCOUT values.
- 4) Two expansion ports.
- 5) Audio mute function.
- 6) 75Ω driver output (pins 20 and 23) requires no attached capacitor.
