Quadruple Differential Line Receivers With 3 State Outputs

REJ03D0306-0200Z
 (Previous ADE-205-582 (Z))
 Rev.2.00

Description

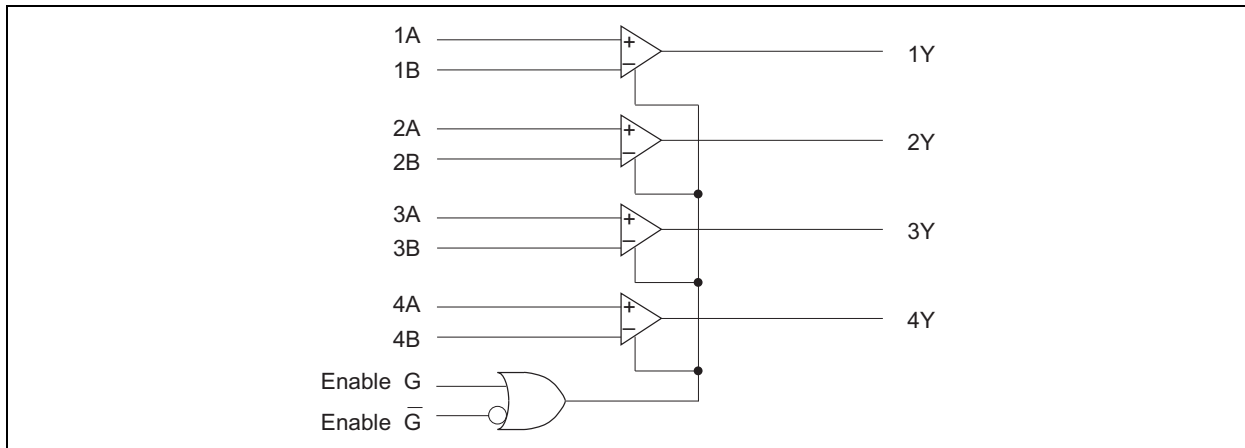

The HD29413 features quadruple differential line receivers designed to meet the spec of EIA RS-422A and RS-423A. The device operates from a single 5 V power supply. The enable function is common to all four receivers and offer a choice of active high or active low inputs. (Complementary output enable input.) Fail safe circuit guarantees the outputs always at the high level when the inputs are open.

- L : Low level
- X : Irrelevant
- Z : High impedance

Absolute Maximum Ratings

Item	Symbol	Ratings	Unit
Supply Voltage	V_{CC}^{*1}	+7	V
In Phase Input Voltage	V_{IC}^{*2}	-25 to +25	V
Differential Input Voltage	V_{ID}^{*3}	0 to +25	V
Enable Input Voltage	V_{IN}	+7	V
Output Sink Current	I_o	+50	mA
Operating Temperature	T_{opr}	0 to +70	°C
Storage Temperature	T_{stg}	-65 to +150	°C

- Notes:
1. All voltage values except for differential input voltage are with respect to ground terminal.
 2. $V_{IC} = 1/2 (V_{IA} + V_{IB})$ $|V_{ID}| = |V_{IA} - V_{IB}|$
 3. Differential input voltage is measured at the noninverting input with respect to the corresponding inverting input.
 4. The absolute maximum ratings are values which must not individually be exceeded, and furthermore, no two of which may be realized at the same time.

Recommended Operating Conditions

Keep safety first in your circuit designs!

1. Renesas Technology Corp. puts the maximum effort into making semiconductor products better and more reliable, but there is always the possibility that trouble may occur with them. Trouble with semiconductors may lead to personal injury, fire or property damage.
Remember to give due consideration to safety when making your circuit designs, with appropriate measures such as (i) placement of substitutive, auxiliary circuits, (ii) use of nonflammable material or (iii) prevention against any malfunction or mishap.

Notes regarding these materials

1. These materials are intended as a reference to assist our customers in the selection of the Renesas Technology Corp. product best suited to the customer's application; they do not convey any license under any intellectual property rights, or any other rights, belonging to Renesas Technology Corp. or a third party.
2. Renesas Technology Corp. assumes no responsibility for any damage, or infringement of any third-party's rights, originating in the use of any product data, diagrams, charts, programs, algorithms, or circuit application examples contained in these materials.
3. All information contained in these materials, including product data, diagrams, charts, programs and algorithms represents information on products at the time of publication of these materials, and are subject to change by Renesas Technology Corp. without notice due to product improvements or other reasons. It is therefore recommended that customers contact Renesas Technology Corp. or an authorized Renesas Technology Corp. product distributor for the latest product information before purchasing a product listed herein.
