DESCRIPTION

The 4024B is a single chip monolithic medium scale integrated circuit containing N-Channel and P-Channel enhancement-mode MOS transistors. Seven single-phase clocked counting stages are provided with the Q output of each stage accessible. The Counter is reset to "zero" by a high level on the Reset input. Each counter stage is a static master-slave flip-flop. The counter state is advanced one count on the negative-going transition of each input pulse.

TRUTH TABLE

Clock	Reset	State
0	0	No Change

1	0	No Change
1	1	All Outputs Low
⎍	0	No Change
⎍	1	All Outputs Low
⎍	0	Advance One Count
