

Dual operational amplifier with switch, for audio use (2 inputs / 1 output × 2)

BA3129 / BA3129F

The BA3129 and BA3129F contain two circuits with operational amplifiers configured of two differential input circuits, an output circuit, and a switch circuit. The two differential input circuits are separate, enabling independent settings to be entered for the amplifier gain and frequency characteristic.

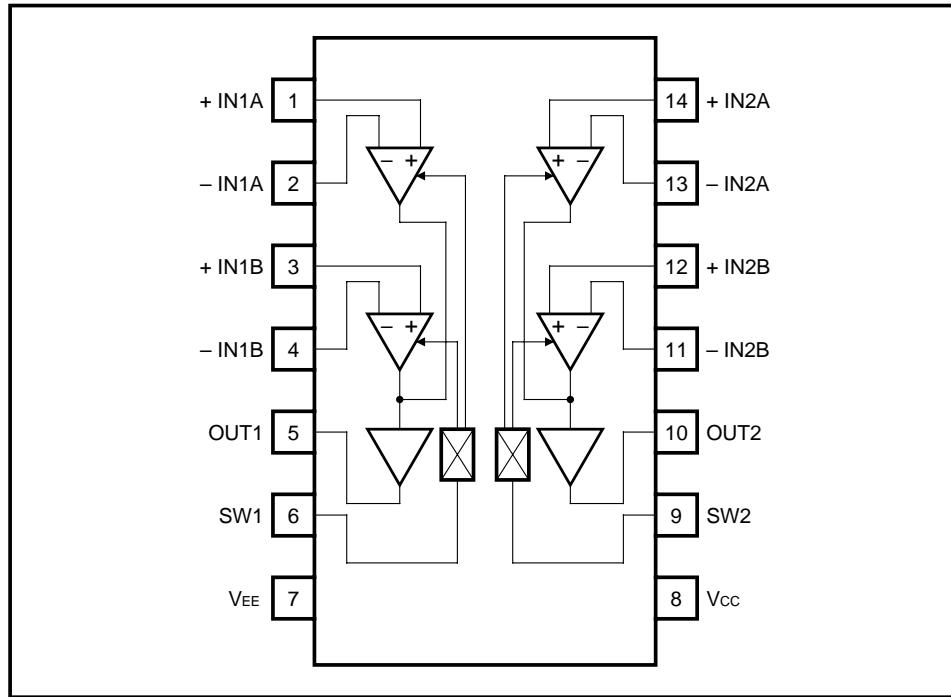

● Applications

Audio amplifiers and other electronic circuits

● Features

- 1) Can drive both dual or single power supplies.
- 2) High gain and low distortion.
($Gv = 110\text{dB}$, THD = 0.0015%)
- 3) Low noise. ($Vn = 2\mu\text{V}_{\text{rms}}$ typ.: FLAT)
- 4) Little switching noise.
- 5) Internal phase compensation.

Slew rate	S _R	—	2.4	—	V / μs	G _V = 0dB, R _L ≤ 2kΩ
Gain band width product	GBW	—	6.5	—	MHz	f = 10kHz
Input conversion noise voltage	V _N	—	2.0	—	μVrms	R _L = 2kΩ, B. P. F = 20 ~ 30kHz
Crosstalk between A-B	C _{TAB}	—	85	—	dB	f = 1kHz
Total harmonic distortion	THD	—	0.0015	—	%	f = 1kHz, V _O = 5Vrms
Channel separation	CS	—	120	—	dB	f = 1kHz, input conversion

*1 Because the first stage is configured with a PNP transistor, input bias current is from the IC.

○ Not designed for radiation resistance.

● Operation notes

(1) Using SW pins

The Pin 6 and Pin 9 SW pins control switching of the dual-system differential input amplifier. When the current flowing from the SW pins is detected, the differential input amplifier is switched. If no current is flowing from the SW pins, the A amplifier is activated, and if current of $20\mu\text{A}$ or higher is flowing, the B amplifier is activated.

The pin voltage is $V = V_{CC} - (5 \times 10^3 + 10 \times 10^3) I - 0.7$. Thus, R1 and R2 are set so that when the switch is off, the switching current is $1\mu A$ or lower, and when the switch is on, the switching current is $20\mu A$ or higher.

● Application example

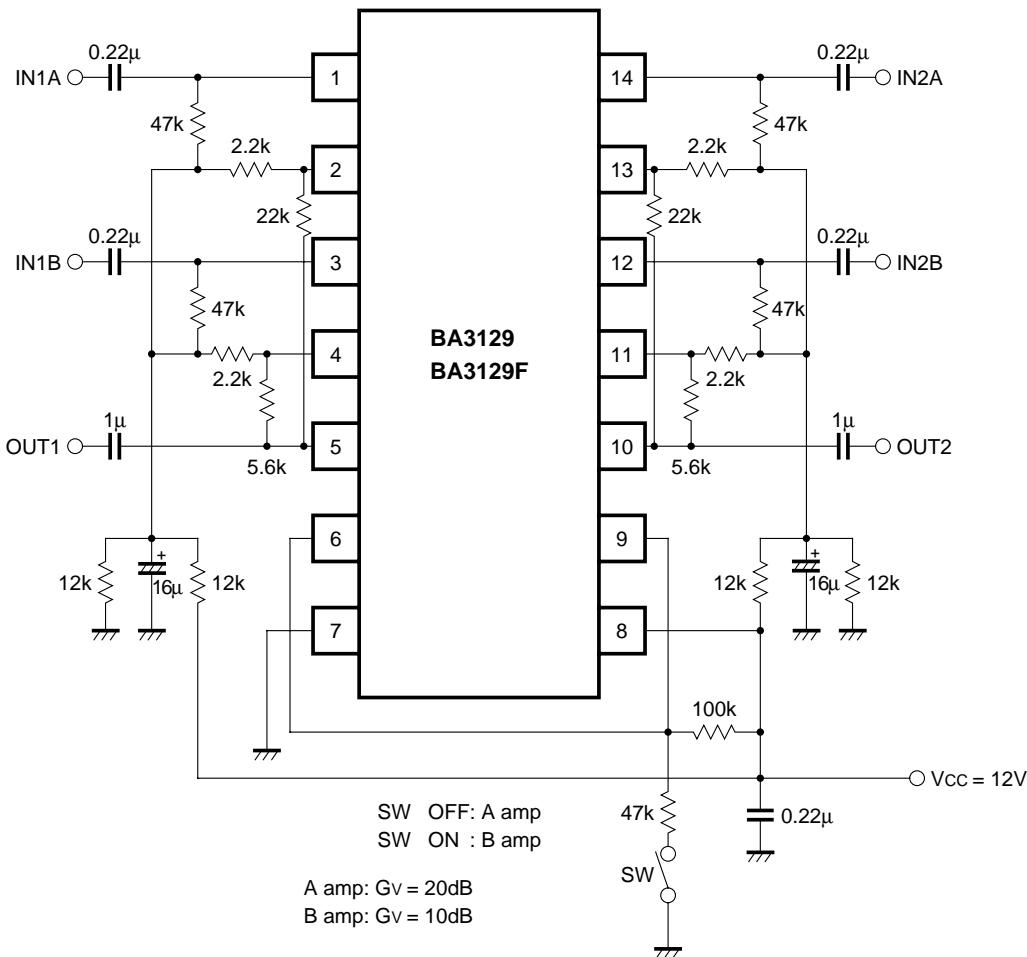

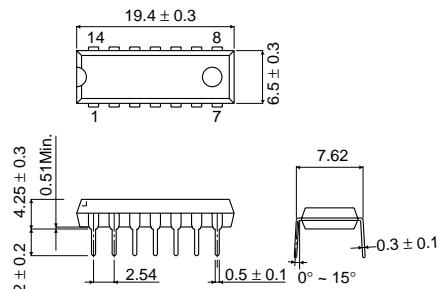

Fig.2

When the switch is off, Pins 6 and 9 are open, resulting in high impedance. To guard against induction noise and other adverse effects, we recommend using a pull-up resistance.
