

6V/800mW single-channel power amplifier

BA527

The BA527 is a monolithic power amplifier designed for portable cassette players and radio cassette players. With a 6V power supply, it has a rated output of 800mW into a 4Ω load (THD = 10%). It is a high-grade design that generates almost no audible switching noise, and is ideal for high-end compact cassette players (including those with radio).

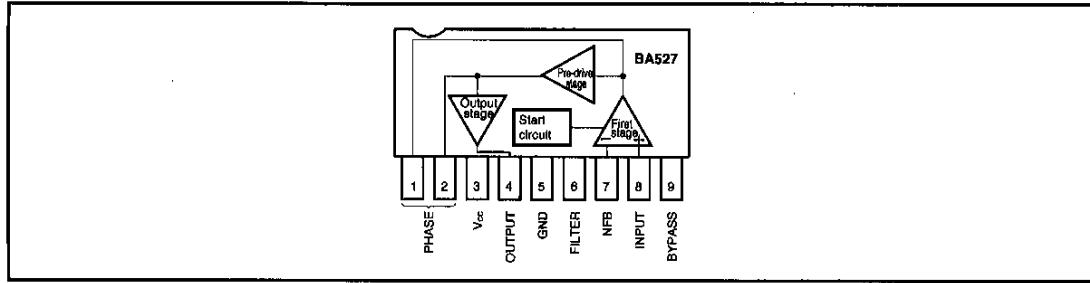

● Applications

Portable cassette recorders and radio cassette recorders

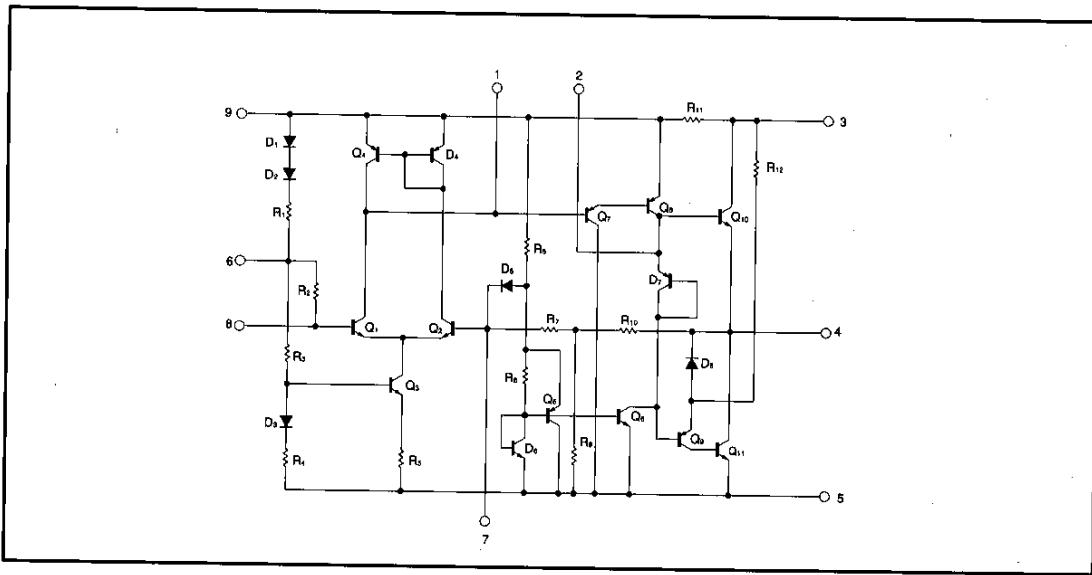

● Features

- 1) Rated power output is 800mW ($V_{cc} = 6V$ and a 4Ω load (THD = 10%). Maximum output is 1300mW.
- 2) Pin compatible with the Rohm BA526 power amplifier, and can be interchanged to suit the application.
- 3) Compact 9-pin SIP package that does not require a heatsink. Allows more compact set designs, and is easy to mount.
- 4) High ripple-rejection ratio (55dB) and generates almost no "pop" noise.
- 5) Excellent low voltage characteristics (starts operating at $SV < 2.8V$).
